Over the past 30 years, Egan's
THE SKILLED HELPER has
taught thousands of students
like you a proven, step-by-step

counseling process that leads to increased confidence and competence. Internationally recognized for its successful problem-management and opportunity development approach to effective helping, the text emphasizes the collaborative nature of the therapist-client relationship and uses a practical, three-stage model that drives client problem-managing and opportunity-developing action. As you read, you'll also gain a feeling for the complexity inherent in any helping relationship. In this tenth edition, Egan now makes use of

his version of the “common factors” approach, which gives new meaning and vitality to the book’s themes, as well as to the use of the problem-management model to organize and give coherence to those themes. Workbook for Egan's Fundamentals of Respiratory Care HarperCollins This revised and updated third

edition offers a range of strategies, activities and ideas to bring mathematics to life in the primary classroom. Taking an innovative and playful approach to maths teaching, this book promotes creativity as a key element of practice and offers ideas to help your students develop knowledge, understanding and enjoyment of the subject. In the creative classroom, mathematics becomes a tool to build confidence, develop problem solving skills and motivate children. The fresh approaches explored in this book include a range of activities such as

storytelling, music and construction, elevating maths learning beyond subject knowledge itself to enable students to see mathematics in a new way. Key chapters of this book explore:

- Learning maths outdoors - make more noise, make more mess or work on a larger scale
- Everyday maths - making sense of the numbers, patterns, shapes and measures children see around them
- Music and maths – the role of rhythm in learning, and music and pattern in maths

Stimulating, accessible and underpinned by the latest research and theory, this is

essential reading for trainee and practising teachers who wish to embed creative approaches to maths teaching in their classroom.

"Nimbly splices together history, science, reporting and personal experiences into a taut and cautiously hopeful narrative...."

Egan's book is bursting with life (and yes, death)." —Robert Moor, New York Times Book Review

The Great Lakes—Erie, Huron, Michigan, Ontario, and Superior—hold 20 percent of the world's supply of surface fresh water and provide sustenance, work, and recreation for tens of millions of Americans. But they are under threat as never before, and their problems are spreading across the continent. The Death and Life of the Great Lakes is prize-

winning reporter Dan Egan's compulsively readable portrait of an ecological catastrophe happening right before our eyes, blending the epic story of the lakes with an examination of the perils they face and the ways we can restore and preserve them for generations to come.

- "Part horror

tale, part mystery, part romance ... utterly fantastic."—O, The Oprah Magazine • The bestselling, award-winning author of A Visit from the Goon Squad brilliantly conjures a world from which escape is impossible and where the keep—the tower, the last stand—is both everything worth protecting and the

very thing that must be surrendered in order to survive. Two cousins, irreversibly damaged by a childhood prank, reunite twenty years later to renovate a medieval castle in Eastern Europe. In an environment of extreme paranoia, cut off from the outside world, the men reenact the signal event of

their youth, with even more catastrophic results. And as the full horror of their predicament unfolds, a prisoner, in jail for an unnamed crime, recounts an unforgettable story that seamlessly brings the crimes of the past and present into piercing relation. A radically practical guide to making food choices that are good for you, others, and the planet. Is organic really worth it? Are eggs ok to eat? If so, which ones are best for you, and for the chicken—Cage-Free, Free-Range, Pasture-Raised? What about farmed salmon, soy milk, sugar, gluten, fermented foods, coconut oil, almonds? Thumbs-up, thumbs-down, or somewhere in between? Using three criteria—Is it good for me? Is it good for others? Is it good for the planet?—Sophie Egan helps us navigate the bewildering world of food so that we can all become conscious eaters. To eat consciously is not about diets, fads, or hard-and-fast rules. It's about

having straightforward, accurate information to make smart, thoughtful choices amid the chaos of conflicting news and marketing hype. An expert on food's impact on human and environmental health, Egan organizes the book into four categories—stuff that comes from the ground, stuff that comes from animals, stuff that comes from factories, and stuff that's made in restaurant kitchens. This practical guide offers bottom-line answers to your most top-of-mind questions about what to eat. “The clearest, most useful food book I own.” —A. J. Jacobs, *New York Times* bestselling author

World War II commando, Cold
War spy, and CIA director
under presidents Nixon and

Ford, William Egan Colby played a critical role in some of the most pivotal events of the twentieth century. A quintessential member of the greatest generation, Colby embodied the moral and strategic ambiguities of the postwar world, and first confronted many of the dilemmas about power and secrecy that America still grapples with today. In Shadow Warrior, eminent historian Randall B. Woods presents a riveting biography of Colby, revealing that this crusader for global democracy was also drawn to the darker side of American power. Aiming to help

reverse the spread of totalitarianism in Europe and Asia, Colby joined the U.S. Army in 1941, just as America entered World War II. He served with distinction in France and Norway, and at the end of the war transitioned into America's first peacetime intelligence agency: the CIA. Fresh from the fight against fascism, Colby zealously redirected his efforts against international communism. He insisted on the importance of fighting communism on the ground, doggedly applying guerilla tactics for counterinsurgency, sabotage, surveillance, and information-

gathering on the new battlefields of the Cold War. Over time, these strategies became increasingly ruthless; as head of the CIA's Far East Division, Colby oversaw an endless succession of assassination attempts, coups, secret wars in Laos and Cambodia, and the Phoenix Program, in which 20,000 civilian supporters of the Vietcong were killed. Colby ultimately came clean about many of the CIA's illegal activities, making public a set of internal reports -- known as the "family jewels" -- that haunt the agency to this day. Ostracized from the intelligence

community, he died under suspicious circumstances -- a murky ending to a life lived in the shadows. Drawing on multiple new sources, including interviews with members of Colby's family, Woods has crafted a gripping biography of one of the most fascinating and controversial figures of the twentieth century.

An eminently practical guide, *Teaching as Story Telling* shows teachers how to integrate imagination and reason into the curriculum when planning classes in social studies, language arts,

mathematics, and science. In his innovative book, Kieran Egan refashions the ancient function of the storyteller with such clarity that any teacher can step into the role with confidence. Not only does Egan's book make the reader look anew at what is too often taken for granted about the ways in which children learn, it opens up a range of critical questions about our orientation to "objectives" and to either/ors when it comes to the affective and the cognitive.

Andrew Worth is a science journalist with optic nerve taps and a gut full of memory chips. Burnt out after completing a documentary on controversial developments in biotechnology, he turns down a chance to report on a baffling new mental disorder known as Distress and instead takes an assignment covering the Einstein Centenary Conference on the artificial island of Stateless. There, a young South African physicist, Violet Mosala, is expected to unveil her candidate for a Theory of Everything. But the assignment is not the tropical respite Worth was expecting. While the politics surrounding the creation of Stateless grows more turbulent, and ignorance cults stage protests against the gathering

scientists, a secretive group known as the Anthrocosmologists, with some very strange ideas about the Theory of Everything, begin to enact their own agenda.

The skilled helper model of

counselling is hugely influential in the helping professions. Egan's Skilled Helper Model brings a number of new and challenging perspectives to bear on Egan's work and makes a major contribution to the development of this problem-management and opportunity-development approach to helping. Val Wosket draws on over twenty years experience of counselling, training and supervising to provide a clear exposition of the model and situate it in contemporary counselling practice. Numerous case studies are provided throughout, along with contributions from experienced practitioners, illustrating how the model can be applied in a variety of clinical settings and with a range of

counselling issues. Egan's Skilled Helper Model builds on and extends the aims of Egan's original work, covering key topics, including: Developing a client-responsive approach that places the therapeutic relationship at the heart of the model Applying the skilled helper model in research, training and supervision Translating the model into more accessible and adaptable language This book provides an invaluable resource for trainees, trainers, supervisors and experienced practitioners wishing to update their knowledge of the model. It will also be of great interest to anyone in the helping professions looking for a pragmatic integrative framework that is adaptable to a diverse range of

client issues and contexts.

The Skilled Helper: A Problem-Management and Opportunity-Development Approach to Helping Anchor

The films of John Waters (b. 1946) are some of the most powerful send-ups of conventional film forms and expectations since Luis Bu-uel and Salvador Dali ' s Un Chien Andalou. In attempting to reinvigorate the experience of movie-going with his shock comedy, Waters has been willing to take the chance of offending nearly everyone. His characters have great dignity and resourcefulness, taking what ' s

different or unacceptable or grotesque about themselves, heightening it and turning it into a handmade personal style. The interviews collected here span Waters ' s career from 1965 to 2010 and include a new one exclusive to this edition. Waters began making films in his hometown of Baltimore in 1964. Demonstrating an innate talent at capturing the hideous and crude and elevating it to art, he reached international acclaim with his outrageous shock comedy Pink Flamingos. This landmark film redefined cinema and became a cult classic. Appearing in this and many of

Waters ' s early films, his star Divine would consistently challenge gender definitions. With Polyester, Waters entered the mainstream. The film starred Divine as an unhappy housewife who romances a former teen idol played by Tab Hunter. Waters ' s commercial breakthrough, Hairspray, told the story of Baltimore ' s televised sock-hop program, The Corny Collins Show, and how one brave girl (Ricki Lake) used her platform as a dancer to end segregation in her town. From Serial Mom and Pecker to Cecil B. Demented, Waters continued to infiltrate the mainstream with

his unique approach to filmmaking. As a visual artist, he was given a retrospective at the New Museum of Contemporary Art in 2004, which was shown at galleries around the world.

In this updated and expanded second edition, Keith Potts and Nii Ankrah examine key issues in construction cost management across the building and civil engineering sectors, both in the UK and overseas. Best practice from pre-contract to post-contract phases of the project life-cycle are illustrated using major projects such as

Heathrow Terminal 5, Crossrail and the London 2012 Olympics as case studies. More worked examples, legal cases, case studies and current research have been introduced to cover every aspect of the cost manager ' s role. Whole-life costing, value management, and risk management are also addressed, and self-test questions at the end of each chapter support independent learning. This comprehensive book is essential reading for students on surveying and construction management programmes, as well as built environment practitioners with cost or project management

responsibilities.
