However, they will only be labeled with a

letter. You will again combine each unknown solution with every other solution and use your observations to determine the identity of each solution. To conserve chemicals, you will use conduct a "microscale" lab. Each lab table will be given eight dropper bottles or test tubes with pipettes to share.

When I've done  
trainings on the  
8-solution problem,  
participants (as  
individuals) have had  
mixed reactions [pun  
intended]. They enjoy  
the microscale nature  
of the lab, the easy  
clean-up, the ability  
to see so many  
visually stimulating  
double replacement  
reactions, and yet the  
sheer volume of work  
is daunting.
