El Nino is the "warm phase" of a larger phenomenon called the El Nino-Southern Oscillation (ENSO). La Nina, the "cool phase" of ENSO, is a pattern that describes the unusual cooling of the region's surface waters. El Niño and La Niña are considered the ocean part of ENSO, while the Southern Oscillation is its atmospheric changes.

El Niño years can change storm activity, causing stronger typhoons (hurricanes) in the Pacific and quieter hurricane seasons in the Atlantic. This year's El Niño is the first since 2010. (Events in 2012 and 2014 fizzled out before they could officially take off.) The strongest effects from El Niño usually hit each hemisphere in its winter. Countries in the
