The battery charger and the controller are both sources of electrical drain. Unplug the battery charger DC plug from the vehicle receptacle. On PDS vehicles, disconnect the controller from the battery set by selecting the 'TOW/ MAINTENANCE' position on the RUN-TOW/MAINTENANCE SWITCH located under the passenger seat.

Wiring Problems: Loose wiring or a wire that 's damaged can definitely cause the EZGO RXV to not move. It could be the wire that 's connected to the batter or to the tow run switch. Brake Problems: Many times the reason your RXV won ' t move is because of brake problems. The RXV is designed to be disabled when there is a problem with the break.

How to Repair Electrical Problems on an E-Z-GO Golf Cart ...

Ok, I got the Ezgo moving. I think the problem is in the key switch. Following the diagram from the service manual, I was not getting any connection from the key switch. Wile checking the switch the thing just started working. Then the connection through the switch was working again. How do you get to the back of the switch.

Electric Ezgo Troubleshooting Guide

Check your tire pressure to be sure it is at the proper level. E-Z-Go electric carts with low tire pressure will experience an increased load on the batteries which will slow you down and decrease the distance you can drive before recharging.

Inflate tires to 18 to 22 PSI. Step 4

Most E-Z-GO golf cart ignition wires plug into the solenoid (a cylindrical coil of wire) and can become dislodged when the cart is operated on heavy terrain. If the wire is loose, reseal it in the solenoid. If the wire is frayed or corroded, consider replacing it. Step 5.

Ezgo RXV ELECTRIC Manuals | ManualsLib

Follow these steps to troubleshoot the controller of an EZGO: When the cart is to be serviced or the controller needs troubleshooting, the maintenance switch under the seat needs to be flipped. Flip the switch and turn the tow maintenance mode on. Now, take the negative battery cable (black) and disconnect it.
