Compendium of Philippine Social Statistics HSRC Press

This is Volume I of eighteen in a series on the Sociology of Work and Organisation. First published in 1960, this is a study following the appointment Carr Committee, in 1956, of the and in the interest aroused by the Committee's Report Training for Skill-Recruitment and Training of young Workers in Industry (1958). The Carr Report and the discussion centred on it not only show the importance of the subject but also indicate the need for independent and detailed research in this field. Because certain features of apprenticeship are changing continuously and rapidly, it is inevitable that in a study of this kind some of the facts should be out of date by the time of publication.

Clinical Engineering Handbook, Second Edition, covers modern clinical engineering topics, giving experienced professionals

the necessary skills and knowledge for this fast-evolving field. Featuring insights from leading international experts, this book presents traditional practices, such as healthcare technology management, medical device service, and technology application. In addition, readers will find valuable information on the newest research and groundbreaking developments in clinical engineering, such as health technology assessment, disaster preparedness, decision support systems, mobile medicine, and prospects and guidelines on the future of clinical engineering. As the biomedical engineering field expands throughout the world, clinical engineers play an increasingly important role as translators between the medical, engineering and business professions. In addition, they influence procedures and policies at research facilities, universities, and in private and government agencies. This book explores their current and continuing reach and its importance. - Presents a definitive, comprehensive, and up-to-date resource on clinical engineering - Written by worldwide experts with ties to IFMBE, IUPESM, Global CE Advisory Board, IEEE, ACCE, and more - Includes coverage of new topics, such as Health Technology Assessment (HTA), Decision Support Systems (DSS), Mobile Apps, Success Stories in Clinical Engineering, and Human Factors Engineering
Journal Cambridge University Press

In Bombardier Abroad, Thomas examines several cases of the Canadian aerospace giant's work in the high-speed rail sector in South Africa, China/Tibet, and Israel/Palestine and argues that these projects are deepening existing social and political tensions. By participating in these infrastructure projects, Thomas argues, Bombardier is both inserting itself into highly contested social and political climates and profiting from actions that further exacerbate existing conditions of dispossession and inequality. Thomas also examines the various ways in which the Canadian state supports the work of Bombardier in these countries. Centred around a theoretical framework that combines concepts of dispossession, political economy and important interventions from the field of settler colonial studies, Bombardier Abroad is a critical look at the problematic practices of a Canadian corporation and the ways in which the Canadian state is culpable.

FCS Engineering Systems L2 Academic Press

A new edition of this popular single volume survey of the British economy from industrialisation to the present day. This key text has been updated to cover a further decade of Britain's economic and social fortunes. In particular the chapters on the industrial revolution have been extensively revised and there is a new chapter on environmental history. The Industrial Age marshals a wealth of statistical and other evidence, using economic theory to analyse recent British economic change.

Transactions - The South African Institute of Electrical Engineers Routledge

The study provides a demographic analysis of employment trends across the public and private sectors of the economy, and investigates the demand for engineers, technologists and technicians in the workforce. A comprehensive analysis of the educational context for engineering professionals focuses on enrolment, graduation and throughput trends in all engineering disciplines at universities and universities of technology, and reveals that although there have been positive innovations in education and training strategies in recent years, many issues, especially at secondary school level, remain a challenge. Women in engineering is a particular focus of this study, which devotes a chapter to examining the factors that influence their choice of career, the barriers they experience in the labour market and strategies for encouraging women into the profession. This comprehensive monograph offers valuable quantitative and qualitative

information about engineering capacity across all engineering disciplines in South Africa. It is therefore an important reference for all engineering academics as well as decision-makers in both the private and public sectors, and will be useful to aspiring and current engineering students, whatever their field.

The S.A. Electrical Review HSRC Publishers

This text analyses how technical colleges have responded to the emerging field of further education and training (FET) in South Africa. The data and theories presented are the result of research conducted by the Human Sciences Research Council, including surveys of technical college graduates and employers on their satisfaction with college graduates and institutional profiles of local labor markets. The international case studies of vocational and technical education demonstrate the interrelatedness of education and training systems.
