Created for smart, aspiring young women, *The REAL SIMPLE Guide to Real Life* offers REAL SIMPLE's clever solutions for navigating adulthood with ease, confidence, and style. This essential handbook helps to simplify (and demystify) landing a job, finding an apartment, decorating on the cheap, cooking for one, dressing for work, organizing a small space, picking a mentor, writing a thank-you note (yes, they're still a thing)-plus all the know-how you need to deal with 401(k)s, kitchen fails, epic hangovers, messy roommates, and even messier breakups. Packed with useful 'Life 101' tips, the book also features essays from bestselling writers (including Cristina Henriquez and J. Courtney Sullivan) and advice from relatable and successful women (like Jessica Alba and Emmy Rossum) about what they wish they had known when they were starting out. *The REAL SIMPLE Guide to Real Life* is full of wit, wisdom, and practical information--a trusted, must-have resource for making every crazy, colorful day easier. Gift it to a recent graduate or young woman who aspires to have it all or keep for yourself as a reference to help you thrive in the real world.

From a leading Yale expert and serial entrepreneur, a radical, principled, and field-tested approach that identifies what's really at stake in any negotiation and ensures you get your half—so you can focus on growing the pie. Negotiations are incredibly stressful and can bring out the worst in people. Wouldn't it be better if there were a principled way to negotiate? Wouldn't it be even better if there were a way to treat people fairly and get treated fairly in a negotiation? *Split the Pie* offers a new approach that does both—a field-tested method that reframes how negotiations play out. Barry Nalebuff, a professor at Yale School of Management, helps identify what's really at stake in a negotiation: the "pie." The negotiation pie is the additional value created through an agreement to work together. Seeing the relevant pie will change how you think about fairness and power in negotiation. You'll learn how to get half the value you create, no matter your size. Filled with examples and in-depth case studies, *Split the Pie* is a practical and theory-based approach to negotiation. You'll see how it helped reframe a high-stakes negotiation when Coca-Cola purchased Honest Tea, a company Barry cofounded with his former student Seth Goldman. The pie framework also works for everyday negotiations. You'll learn how to deploy logic to determine truly equitable solutions and employ empathy to expand the pie and sell your solution. *Split the Pie* allows both sides to focus their energy on making the biggest possible pie—to have your pie and eat it too.

"The velvet tongue" That's what they hear "The silent fixer" That's what they whisper "Turo DeMarco can slice you with that smile" It's been known to happen But the one truth they don't know could get me killed. It's already gotten me thrown into the fire. I'm the rising dark star of Chicago's criminal underworld, but I've

been warned, and I have one chance to make things right, flying halfway around the world to do it. Then one hot AF heiress gets in my way with an unforgettable kiss and a blast of gunfire, hurling us both into the eye of a Mediterranean hurricane, tangling us in the ultimate high stake game. Our impulsive escape to a Greek island exposes cruel lies, sour truths, explosive passion, and bares our bitter souls. I was always told that actions speak louder than words, and Adriana proved it to me. Yet there's one thing that speaks even louder - Blood. Blood in my heart, blood on my hands. Blood never lies, never plays games. Neither do I.

Nearly every night on every major network, "unscripted" (but carefully crafted) "reality" TV shows routinely glorify retrograde stereotypes that most people would assume got left behind 35 years ago. In *Reality Bites Back*, media critic Jennifer L. Pozner aims a critical, analytical lens at a trend most people dismiss as harmless fluff. She deconstructs reality TV's twisted fairytales to demonstrate that far from being simple "guilty pleasures," these programs are actually guilty of fomenting gender-war ideology and significantly affecting the intellectual and political development of this generation's young viewers. She lays out the cultural biases promoted by reality TV about gender, race, class, sexuality, and consumerism, and explores how those biases shape and reflect our cultural perceptions of who we are, what we're valued for, and what we should view as "our place" in society. Smart and informative, *Reality Bites Back* arms readers with the tools they need to understand and challenge the stereotypes reality TV reinforces and, ultimately, to demand accountability from the corporations responsible for this contemporary cultural attack on three decades of feminist progress.

The era of analog drawing is coming to an end. Computer-generated visualizations are pushing sketches and drawings increasingly into the background and fundamentally changing the representation of landscape architecture. For the Berlin-based landscape architect and sculptor Udo Dagenbach, sketches are not only a universal communication medium but also an essential design tool. *Sketch for Green* invites the reader to take a stroll through analog works and internationally realized projects from the last 40 years. The focus is on topics related to landscape architecture and sculptures made of wood, stone, and plants, rounded off by portraits, furniture, and jewelry designs.

Hardbound. This symposium brought together end-users, managers and designers to examine and discuss the interaction between automated systems and related technologies and those working with them. It is increasingly clear that the optimum method to implement modern production processes is to involve all participants in the systems paying particular attention to the needs and abilities of end users and machine operators. The papers in this volume represent progress towards the goal of an increase in the efficiency of technology and the workforce and the realization of a skill based system of manufacturing, process and clerical work.

To enjoy woodworking, all you need is a few essential tools, a little bit of space, and the desire to make something with your own two hands. *The Minimalist Woodworker* is about making woodworking clean and simple--from the tools and the workspace to the easy-to-follow instructions. Woodworking is thriving in the hands-on, DIY, maker world we currently live in. Yet, for its increasing popularity, there are many crafters who don't engage in woodworking because they falsely believe you need a large workshop and a full-blown collection of tools and equipment. *The Minimalist Woodworker* disproves this myth. It eliminates the fears and excuses as it demystifies the craft. Written by Vic Tesolin, aka the Minimalist Woodworker, a woodworker and woodworking instructor, *The Minimalist Woodworker* is a stress-free approach for the hobbyist that emphasizes the destination is actually the journey. Beginning with an understanding of the minimalist mindset, *The Minimalist Woodworker* quickly details how to make a small space productive and outlines the most efficient tools for a woodworker. Each piece of equipment is explained and instructions on how to use are provided. Techniques for keeping them sharp and maintained are also explained. Once space and tools are covered, seven projects are presented: a saw bench and matching saw horse, a Nicholson-style workbench, a shooting board/bench hook, a shop mallet, and a small hanging cabinet. Each project not only develops woodworking skills, but also outfits the minimalist woodworker's small shop. With step-by-step instruction, photos and illustrations, and an easy-going voice, *The Minimalist Woodworker* offers a stress-free point of entry into the life-long craft of woodworking.

This book provides the reader with a comprehensive, relevant, and visually rich insight into the world of research methods specifically aimed at product designers. It includes practical case studies and tutorials that will inform, inspire, and help you to conduct product design research better. Product designers need a comprehensive understanding of research methods as their day-to-day work routinely involves them observing people, asking questions, searching for information, making and testing ideas, and ultimately generating 'solutions' to 'problems'. Manifest in the design process is the act of research. Huge technological advances in information, computing, and manufacturing processes also offer enormous opportunities to product designers such as the development of "intelligent" products and services, but at the same time raise important research questions that need to be dealt with. Product designers are, in many ways, best placed to address these challenges because of the manner in which they apply their design thinking to problems.
