What does it take to succeed today both personally and professionally? In looking for answers, one obvious place to start would be to talk to self-made men and women who themselves are successful. That's exactly what Michael W. Sonnenfeldt—an accomplished entrepreneur—has done here in this ground-breaking book. Drawing on the wisdom, insight and experience of members of TIGER 21 (The Investment Group for Enhanced Results in the 21st Century), and supplementing that with additional research and interviews, Sonnenfeldt offers real-world guidance and often counter-intuitive advice and conclusions. Among the things you'll learn are: Why grit and focus trump intelligence just about every time. Why having—and listening to—a wise mentor will create shortcuts to getting more done. What you need to do to avoid getting in your own way. And why. 'Shirtsleeves to shirtsleeves in three generations' can be avoided by taking some simple, commonsense steps. Think BIGGER will inspire you, no matter where you are in your business career. It will also show you that the skills you use to grow wealth can be applied to making the world a better place. Your success can benefit others. Michael W. Sonnenfeldt is the founder and chairman of

TIGER 21, the premier peer-to-peer learning network for high-net-worth first generation wealth creators in North America and London. He is an accomplished serial entrepreneur, philanthropist and most excited that all of his proceeds from this book will support the TIGER 21 Foundation for young entrepreneurs.

Develop an extendable smart robot capable of performing a complex series of actions with Python and Raspberry Pi Key Features Get up to speed with the fundamentals of robotic programming and build intelligent robots Learn how to program a voice agent to control and interact with your robot's behavior Enable your robot to see its environment and avoid barriers using sensors Book Description We live in an age where the most complex or repetitive tasks are automated. Smart robots have the potential to revolutionize how we perform all kinds of tasks with high accuracy and efficiency. With this second edition of Learn Robotics Programming, you'll see how a combination of the Raspberry Pi and Python can be a great starting point for robot programming. The book starts by introducing you to the basic structure of a robot and shows you how to design, build, and program it. As you make your way through the book, you'll add different outputs and sensors, learn

robot building skills, and write code to add autonomous behavior using sensors and a camera. You'll also be able to upgrade your robot with Wi-Fi connectivity to control it using a smartphone. Finally, you'll understand how you can apply the skills that you've learned to visualize, lay out, build, and code your future robot building projects. By the end of this book, you'll have built an interesting robot that can perform basic artificial intelligence operations and be well versed in programming robots and creating complex robotics projects using what you've learned. What you will learn Leverage the features of the Raspberry Pi OS Discover how to configure a Raspberry Pi to build an AI-enabled robot Interface motors and sensors with a Raspberry Pi Code your robot to develop engaging and intelligent robot behavior Explore AI behavior such as speech recognition and visual processing Find out how you can control AI robots with a mobile phone over Wi-Fi Understand how to choose the right parts and assemble your robot Who this book is for This second edition of Learn Robotics Programming is for programmers, developers, and robotics enthusiasts who want to develop a fully functional robot and leverage AI to build interactive robots. Basic knowledge of the Python programming language will help you understand the concepts covered in this robot programming book more effectively.

In this long-awaited book (already a major bestseller in Italy) Ginsborg has created a fascinating, sophisticated and definitive account of how Italy has coped, or failed to cope, with the past two decades. Contemporary Italy strongly mirrors Britain - the countries have roughly the same extent, population size and GNP - and yet they are fantastically different. Ginsborg sees this difference as most fundamentally clear in the role of the family and it is the family which is at the heart of Italian politics and business. Anyone wishing to understand contemporary Italy will find it essential to have this enormously attractive and intelligent book.

Germany's economic miracle is a widely-known phenomenon, and the world-

leading, innovative products and services associated with German companies are something that others seek to imitate. In The 'Made in Germany' Champion Brands, Ugesh A. Joseph provides an extensively researched, insightful look at over 200 of Germany's best brands to see what they stand for, what has made them what they are today, and what might be transferable. The way Germany is branded as a nation carries across into the branding of its companies and services, particularly the global superstar brands - truly world-class in size, performance and reputation. Just as important are the medium-sized and small enterprises, known as the 'Mittelstand'. These innovative and successful enterprises from a wide range of industries and product / service categories are amongst the World market leaders in their own niche and play a huge part in making Germany what it is today. The book also focuses on German industrial entrepreneurship and a selection of innovative and emergent stars. All these companies are supported and encouraged by a sophisticated infrastructure of facilitators, influencers and enhancers - the research, industry, trade and standards organizations, the fairs and exhibitions and all the social and cultural factors that influence, enhance and add positive value to the country's image. Professionals or academics interested in business; entrepreneurship; branding and marketing; product or service development; international trade and business development policy, will find fascinating insights in this book; while those with an interest in Germany from emerging industrial economies will learn something of the secrets of German success.

Global consumption of raw materials currently goes beyond the earth's regenerative capacity, but the circular economy offers a more sustainable model which also provides new business opportunities. Mastering the Circular Economy is an introduction to circularity from a business and value chain management perspective. With many reflections and exercises throughout, the book draws a direct link between relevant recent theory and practice and offers students and practitioners a deeper

understanding of the topic. It looks at both the macro and micro context of the circular economy, from the government and societal view to the impact of new business models in an individual company. Starting from the corporate imperative of moving from linear to circular business models, *Mastering the Circular Economy* covers the associated opportunities and challenges for organizations, from regulation and risk to value chain collaboration, reverse logistics and product quality. Part two of the book helps students to pull together everything they've learned and see how the concepts play out in the real world by guiding them through application in the online business simulation game *The Blue Connection* (free basic access is included with the book). Readers are continuously asked to reflect on the choices they would make in different roles to demonstrate a full understanding of the strategic and operational implications of the circular economy.

Consumers are constantly inundated with repetitive traditional advertising messages, bombarding their lives, interrupting their TV shows and generally getting in the way. The consumer does not feel any real emotional connection with these brands, and if they do buy, it is simply because the brand that shouted the loudest got their attention. This outdated approach to marketing communications is dying, and fast. Brands are realising that to secure the lifetime value of their customers by gaining true customer loyalty, they must give something back. The relationships between brands and their target audiences are being revolutionized. *Experiential Marketing* looks at the new experiential marketing era, which focuses on giving target audiences a fabulous brand-relevant customer experience that adds value to their lives. Experiential marketing is made up of live brand experiences - two way communications between consumers and brands, which are designed to bring brand personalities to life. This book demonstrates how experiential marketing fits in with the current marketing climate, and how to go about planning, activating and evaluating it for best results. This is essential reading for both advertising and marketing practitioners, and marketing students.

Well, there's an app for that, too! And most apps are intentionally addictive distractions that end up taking our attention away from things like family, friends, sleep, and oncoming traffic. There's a better way. In this book, innovator Golden Krishna challenges our world of nagging, screen-based bondage, and shows how we can build a technologically advanced world without digital interfaces. In his insightful, raw, and often hilarious criticism, Golden reveals fascinating ways to think beyond screens using three principles that lead to more meaningful innovation. Whether you're working in technology, or just wary of a gadget-filled future, you'll be enlightened and entertained while discovering that the best interface is no interface.

Our love affair with the digital interface is out of control. We've embraced it in the boardroom, the bedroom, and the bathroom. Screens have taken over our lives. Most people spend over eight hours a day staring at a screen, and some "technological innovators" are hoping to grab even more of your eyeball time. You have screens in your pocket, in your car, on your appliances, and maybe even on your face. Average smartphone users check their phones 150 times a day, responding to the addictive buzz of Facebook or emails or Twitter. Are you sick? There's an app for that! Need to pray? There's an app for that! Dead?
