The first International Conference on Energy Efficiency in Household Appliances was held in Florence, Italy, in November 1997. This book provides a full account of presentations made, discussions and conclusions reached during the four days of the Conference. It offers a comprehensive picture of the issues at stake, of the results achieved so far through the design and application of standards, the promotion of a better consumer information, the development of energy efficient products and technologies as well as of test methods and other analytical tools. It covers the full range of domestic appliances, with specific sections dealing with White Goods, Air Conditioning, Water Heating, Consumer Electronics and Domestic Lighting. Best practice examples are presented, drawn from a wide range of international experiences. Future perspectives are illustrated, including both technology and policy options and the conditions for their implementation.

Small is Profitable Abrams

Abstract: Cold and freezer storage is an important part of food processing and distribution. New power sources and growing energy costs have led to engineering redesigns of storage systems which apply concepts of energy efficiency and conservation. Information on design practices and equipment selection in the refrigeration industry is presented for operators of cold storage installations. Section I describes principles of refrigeration and refrigerants. Section II considers warehouse construction and equipment: small, intermediate and large cold storage facilities; machinery and system selection; control components; and lighting, electrical supply and insulation of freezers and coolers. Section III discusses warehouse and freezer management and use in terms of the recent growth of the refrigerated foods industry and commodity storage requirements.

This volume contains revised versions of selected papers presented dur ing the 23rd Annual Conference of the German Classification Society GfKl (Gesellschaft fiir Klassifikation). The conference took place at the Univer sity of Bielefeld (Germany) in March 1999 under the title "Classification and Information Processing at the Turn of the Millennium". Researchers and practitioners - interested in data analysis, classification, and information processing in the broad sense, including computer science, multimedia, WWW, knowledge discovery, and data mining as well as spe cial application areas such as (in alphabetical order) biology, finance, genome analysis, marketing, medicine, public health, and text analysis - had the op portunity to discuss recent developments and to establish cross-disciplinary cooperation in their fields of interest. Additionally, software and book pre sentations as well as several tutorial courses were organized. The scientific program of the conference included 18 plenary or semi plenary lectures and more than 100 presentations in special sections. The peer-reviewed papers are presented in 5 chapters as follows: • Data Analysis and Classification • Computer Science, Computational Statistics, and Data Mining • Management Science, Marketing, and Finance • Biology, Genome Analysis, and Medicine • Text Analysis and Information Retrieval As an unambiguous assignment of results to single chapters is sometimes difficult papers are grouped in a way that the editors found appropriate.

This practical guide contains seven modules targeted at district and health facility staff. It intends to meet the demands to improve immunization services so as to reach more infants in a sustainable way, building upon the experiences of polio eradication. It includes materials adapted from polio on planning, monitoring and use of data to improve the service, that can be used at any level. Revising the manual has been a team exercise. There are contributions from a large number of experts, organizations and institutions. This new edition has seven modules. Several new vaccines that have become more readily available and used in recent years have been added. Also the section on integration with other health interventions has been expanded as exciting opportunities and experiences have become evident in the years following the previous edition. Module 1: Target diseases and

vaccines Module 2: The vaccine cold chain Module 3: Ensuring safe injections Module 4: Microplanning for reaching every community Module 5: Managing an immunization session Module 6: Monitoring and surveillance Module 7: Partnering with communities.

The New York Times–bestselling author “digs deep into the world of how we shop and how we eat. It’s a marvelous, smart, revealing work” (Susan Orlean, #1 bestselling author). In a culture obsessed with food–how it looks, what it tastes like, where it comes from, what is good for us–there are often more questions than answers. Ruhlman proposes that the best practices for consuming wisely could be hiding in plain sight–in the aisles of your local supermarket. Using the human story of the family-run Midwestern chain Heinen’s as an anchor to this journalistic narrative, he dives into the mysterious world of supermarkets and the ways in which we produce, consume, and distribute food. Grocery examines how rapidly supermarkets–and our food and culture–have changed since the days of your friendly neighborhood grocer. But rather than waxing nostalgic for the age of mom-and-pop shops, Ruhlman seeks to understand how our food needs have shifted since the mid-twentieth century, and how these needs mirror our cultural ones. A mix of reportage and rant, personal history and social commentary, Grocery is a landmark book from one of our most insightful food writers. “Anyone who has ever walked into a grocery store or who has ever cooked food from a grocery store or who has ever eaten food from a grocery store must read Grocery. It is food journalism at its best and I’m so freakin’ jealous I didn’t write it.” –Alton Brown, television personality “If you care about why we eat what we eat–and you want to do something about it–you need to read this absorbing, beautifully written book.” –Ruth Reichl, New York Times–bestselling author

Federal Energy Guidelines Gabriola Island, B.C. : New Society Publishers and Building Green

Today's electricity industry - large power stations feeding a nationwide grid - will soon be a thing of the past. This book explains why and what will replace it - decentralized and distributed electrical resources which can be up to 10 times as economically valuable. The authors - all leading experts in the field - explain very clearly and thoroughly all the benefits, so the engineers will understand the economic advantages and the investors will understand the engineering efficiencies. Here's what industry experts are saying about Small is Profitable... 'A tour-de-force and a goldmine of good ideas. It is going to have a stunning impact on thinking about electricity.' Walter C. Patterson, Senior Research Fellow, Royal Institute of International Affairs, London. 'An amazing undertaking - incredibly ambitious yet magnificently researched and executed.' Dr. Shimon Awerbuch, Senior Advisor, International Energy Agency, Paris. 'Outstanding...You have thought of some [benefits] I never considered...A great resource for the innovation in energy services that will have to take place for us to have a sustainable future.' Dr. Carl Weinberg, Weinberg Associates, former Research Director, PG&E. 'This is a brilliant synthesis and overview with a lot of original analytics and insights and a very important overall theme. I think it is going to have a big impact.' Greg Kats, Principal, Capital E LLC, former Finance Director for Efficiency and Renewable Energy, U.S. Department of Energy. 'E. F. Schumacher would be proud of this rigorous extension of his thesis in Small is Beautiful. It shows how making systems the right size can make them work better and cost less. Here are critical lessons for the new century: technologies tailored to the needs of people, not the reverse, can improve the economy and the environment.' Dr. Daniel Kammen, Professor of Energy and Society and of Public Policy, University of California, Berkeley. 'Small is Profitable creates an unconventional but impeccably reasoned foundation to correctly assign the costs and true benefits of distributed energy systems. It has become an indispensable tool for modelling distributed energy systems benefits for us.' Tom Dinwoodie, CEO and Chairman, PowerLight Corporation. 'A Unique and valuable contribution to the distributed energy industry...Small Is Profitable highlights the societal benefits of distributed resources, and will be a helpful guide to policymakers who wish to properly account for these benefits in the marketplace.' Nicholas Lenssen, Senior Director, Primen. 'This book will shift the electric industry from the hazards of overcentralization toward the new era where distributed generation will rule.' Steven J. Strong, President, Solar Design Associates, Inc. 'Readers will understand why distributed resources are poised to fundamentally alter the electric power system. Its comprehensive review of the benefits of distributed resources [is] an important part of my library.' Dr. Thomas E. Hoff, President, Clean Power Research. 'The most comprehensive treatise on distributed generation.... Great job and congratulations.' Howard Wenger, Principal, Pacific Energy Group '...[D]ensely packed with information and insights...goes a long way

to demonstrate that the former paradigm of electric power supply no longer makes sense.' Prof. Richard Hirsh, University of Vermont, Leading historian of the electric power sector. 'Amory Lovins was already the world's most original and influential thinker on the future of energy services in general and electricity systems in particular. This remarkable book is a very worthy addition to an extraordinary legacy.' Ralph Cavanagh, Energy Co-Director, Natural Resources Defense Council. 'This is a book every utility professional should have on the bookshelf.' Dr Peter S. Fox-Penner, Principal and Chairman of the Board, the Brattle Group, former Principal Deputy Assistant Secretary of Energy.
