The Toys of He-Man and the Masters of the Universe Part 1 Univ Editions

An evolutionary and cognitive account of the science behind why we crack up— “ one of the most complex and sophisticated humor theories ever presented ” (Evolutionary Psychology). Some things are funny—jokes, puns, sitcoms, Charlie Chaplin, The Far Side, Malvolio with his yellow garters crossed—but why? Why does humor exist in the first place? Why do we spend so much of our time passing on amusing anecdotes, making wisecracks, watching The Simpsons? In Inside Jokes, Matthew Hurley, Daniel Dennett, and Reginald Adams offer an evolutionary and cognitive perspective. Humor, they propose, evolved out of a computational problem that arose when our long-ago ancestors were furnished with open-ended thinking. Mother Nature—aka natural selection—cannot just order the brain to find and fix all our time-pressured misleaps and near-misses. She has to bribe the brain with pleasure. So we find them funny. This wired-in source of pleasure has been tickled relentlessly by humorists over the centuries, and we have become addicted to the endogenous mind candy that is humor.

Scholars from various disciplines have studied humor since antiquity. Yet, over the centuries, these researchers have also struggled to conceptualize a viable, well-accepted notion of humor. Beyond pleasure and amusement, people use humor for a variety of social functions. On the one hand, humor can cause others to like the humorous source more, attract regard, ease conversations, promote expression and the exchange of ideas, introduce new topics of discussion, or smooth interactions. On the other hand, in aggressive forms, humor can halt verbal interactions, modify the usual rules of conversation, communicate critiques, or contribute to the creation of subversive environments. Not All Claps and Cheers: Humor in Business and Society Relationships is an original research anthology that considers different angles from which to address the use of humor by individuals, groups and business actors in their interactions within, around, and across organizations—that is, at the interfaces of business and society. Accordingly, the research anthology is organized in four sections—"Humor, Business and Society," "From Society to Business: Humor’s Use and Roles in Activist Movements," "From Business to Society: Humor’s Use and Roles in Marketing, Corporate Communications, and Public Relations," and "Society within Business: Humor’s Use and Roles in the Workplace and in Organizations." This ground-breaking research anthology draws on material from marketing, communications, human resources and stakeholder theory to throw light on this poorly understood facet of human business behavior.

This book examines the portrayal of themes of boundary crossing, itinerancy, relocation, and displacement in US genre paintings during the second half of the long nineteenth century (c. 1860–1910). Through four diachronic case studies, the book reveals how the high-stakes politics of mobility and identity during this period informed the production and reception of works of art by Eastman Johnson (1824–1906), Enoch Wood Perry, Jr. (1831–1915), Thomas Hovenden (1840–95), and John Sloan (1871–1951). It also complicates art history’s canonical understandings of genre painting as a category that seeks to reinforce social hierarchies and emphasize more rooted connections to place by, instead, privileging portrayals of social flux and geographic instability. The book will be of interest to scholars working in art history, literature, American studies, and cultural geography.

Old English Enigmatic Poems and the Play of the Texts consists of a close study of a number of verse texts, most of which are preserved in the Exeter Book of Old English poetry. All of these texts are enigmatic. Some are riddles; others are riddle-like in their manner of simultaneously giving and withholding information. A number of them feature the literary use of runes. The author approaches these poems as microcosms of the art of Old English poetry in general, which (particularly in its more lyrical forms) relies on its audience’s ability to decipher metaphorical language and to fill out many details that remain unexpressed. The author’s chief claim is that Old English poetry is a good deal more playful than is often acknowledged, so that the art of interpreting it can require a kind of 'game strategy' whereby riddling authors match their wits against adventurous readers. New readings of a number of particular poems and passages are offered; the whole collection of Exeter Book riddles is given a set of answers posed in the language of the riddler; and some possible instances of 'creative runography' are explored. The book combines the methods of rigorous philology and imaginative literary analysis.
