Filmatised in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Microwave Effects on DNA and Proteins Macmillan Higher Education

For several years, researchers have been reporting the effects of microwave radiation/heating on both the structure and function of DNA, RNA and proteins. For the most part, favourable accelerated biological functions are observed as microwave induced heating occurs, but other not-so favourable effects are also observed, such as denaturation, fragmentation and the so called and ill-explained, non-thermal microwave effects. This volume, the first of its kind, brings researchers together from around the world to discuss their current findings and thinking on the effects of Microwaves on Biological systems, particularly DNA, RNA and proteins, in the form of contributed edited chapters.

Refugee Routes Springer

The displaced are often rendered silent and invisible as they journey in search of refuge. Drawing on historical and contemporary examples from Turkey, the Ottoman Empire, Iraq, Syria, UK, Germany, France, the Balkan Peninsula, US, Canada, Australia, and Kenya, the contributions to this volume draw attention to refugees, asylum seekers, exiles, and forced migrants as individual subjects with memories, hopes, needs, rights, and a prospective place in collective memory. The book's wide-ranging theoretical, literary, artistic, and autobiographical contributions appeal to scholarly and lay readers who share concerns about the fate of the displaced in relation to the emplaced in this age of mass mobility.

An unprecedented number of people is currently on the move seeking refuge in Europe. Large parts of European societies respond with anxiety and mistrust to the influx of people.

Nationalist, anti-migrant parties from Slovakia over Germany to the UK have gained increasing support among the electorate and challenge the political mainstream. Europe is struggling how to respond. While the search for solutions is ongoing one pattern seems to be emerging: Fortress Europe is in the making. Unfortunately, few of these discussions and measures consider the structural root causes and dynamics of migration, the motives of migrants or societal challenges more thoroughly. This book seeks to address this deficit. Taking migration and asylum policies as a starting point, it analyses the various dimensions underpinning migration. In doing so, it identifies why receiving countries are in many ways part of the problem. To eschew an overtly Euro-centric perspective and stimulate a debate between science and politics, it contains contributions by academics and practitioners alike from both shores of the Mediterranean.

Forgeries are an omnipresent part of our culture and closely related to traditional ideas of authenticity, legality, authorship, creativity, and innovation. Based on the concept of mimesis, this volume illustrates how forgeries must be understood as autonomous aesthetic practices - creative acts in themselves - rather than as mere rip-offs of an original work of art. The proceedings bring together research from different scholarly fields. They focus on various mimetic practices such as pseudo-translations, imposters, identity theft, and hoaxes in different artistic and historic contexts. By opening up the scope of the aesthetic implications of fakes, this anthology aims to consolidate forging as an autonomous method of creation.

This book is dedicated to the fundamental question: How do media and communications practices within European cultures change with their environment? This volume consists of the intellectual work of the 2015 European Media and Communication Doctoral Summer School, organized in cooperation with the European Communication Research and Education Association (ECREA) and a consortium of 21 European partner universities at the ZeMKI, the Centre for Media, Communication and Information Research of the University of Bremen, Germany. The chapters cover relevant research topics, structured into four sections: ?Policies and politics of communication?, ?Civil participation in and through the media?, ?Media representations and usages? and ?On methods?. The Summer School brings together a group of highly qualified doctoral students as well as senior researchers and professors from a diversity of European countries. The main objective of the fourteen-day summer school is to organize an innovative learning process at doctoral level, focusing primarily on enhancing the quality of individual dissertation projects.
