For Albert Einstein, 1905 was a remarkable year. It was also a miraculous year for the history and future of science. In six short months, from March through September of that year, Einstein published five papers that would transform our understanding of nature. This unparalleled period is the subject of John Rigden's book, which deftly explains what distinguishes 1905 from all other years in the annals of science, and elevates Einstein above all other scientists of the twentieth century. Rigden chronicles the momentous theories that Einstein put forth beginning in March 1905: his particle theory of light, rejected for decades but now a staple of physics; his overlooked dissertation on molecular dimensions; his theory of Brownian motion; his theory of special relativity; and the work in which his famous equation,  $E = mc^2$ , first appeared. Through his lucid exposition of these ideas, the context in which they were presented, and the impact they had--and still have--on society, Rigden makes the circumstances of Einstein's greatness thoroughly and captivantly clear. To help readers understand how these ideas continued to develop, he briefly describes Einstein's post-1905 contributions, including the general theory of relativity. One hundred years after Einstein's prodigious accomplishment, this book invites us to learn about ideas that have influenced our lives in almost inconceivable ways, and to appreciate their author's status as the standard of greatness in twentieth-century science.

Over the last two decades, interest in translation around the world has increased beyond any predictions. International bestseller lists now contain large numbers of translated works, and writers from Latin America, Africa, India and China have joined the lists of eminent, bestselling European writers and those from the global English-speaking world. Despite this, translators tend to be invisible, as are the processes they follow and the strategies they employ when translating. *The Translator as Writer* bridges the divide between those who study translation and those who produce translations, through essays written by well-known translators talking about their own work as distinctive creative literary practice. The book emphasises this creativity, arguing that translators are effectively writers, or rewriters who produce works that can be read and enjoyed by an entirely new audience. The aim of the book is to give a proper prominence to the role of translators and in so doing to move attention back to the act of translating, away from more abstract speculation about what translation might involve.

This thesis presents the history of Oneness Pentecostalism in the Philippines for the first time. It traces the origins, development, and current state of this movement. This work will attempt to supply that information and do so in a manner that recognizes the vital roles of the Filipinos. It argues that schism within the movement was unavoidable due to historical and cultural predispositions of the Filipinos when combined with the paternal methods of the missionaries and the schismatic nature of Pentecostalism. Important leaders are examined and presented with heretofore-unpublished details of their lives and works, including missionaries and national leaders such as Diamond A. Noble and Wilde Almeda. Some of the many organizations are studied from the perspective of schism and success and a summary of the entire movement is offered with an analysis as to why people have migrated into it and within it. It attempts to present a way of understanding Oneness Pentecostalism in the Philippines through the examination of schism. Understanding that may contribute to a global understanding of the Oneness movement, or even of Pentecostalism as a whole.

For three weeks Frank focused exclusively on the doll's letters that he handed on every day to the girl. Nobody has ever known who that little girl was and what happened with the letters.

The year 2019 marked a number of significant anniversaries for the People ' s Republic of China (PRC), each representing different ' Chinese dreams ' . There was the centennial of the May Fourth Movement — a dream of patriotism and cultural renewal. The PRC celebrated its seventieth anniversary — a dream of revolution and national strength. It was also thirty years since the student-led Protest Movement of 1989 — dreams of democracy and free expression crushed by government dreams of unity and stability. Many of these ' dreams ' recurred in new guises in 2019. President Xi Jinping tightened his grip on power at home while calling for all citizens to ' defend China ' s honour abroad ' . Escalating violence in Hong Kong, the ongoing suppression of Uyghurs in Xinjiang, and deteriorating Sino-US relations dominated the headlines. Alongside stories about China ' s advances in artificial intelligence and genetically modified babies and its ambitions in the Antarctic and outer space, these issues fuelled discussion about what Xi ' s own ' China Dream ' of national rejuvenation means for Chinese citizens and the rest of the world. The China Story Yearbook: China Dreams reflects on these issues and more. It surveys the dreams, illusions, aspirations, and nightmares that coexisted (and clashed) in 2019 in China and beyond. As ever, we take a cross-disciplinary perspective that recognises the inextricable links between economy, politics, culture, history, language, and society. The Yearbook, with its accessible analysis of the main events and trends of the year, is an essential tool for understanding China ' s growing power and influence around the world.
