Some VPLEX commands to show useful information on the VPLEX CLI can be cumbersome, long and hard to remember. VPLEX Engineering have provided a set of alias commands to set up easy to issue and easy to remember shortcut commands for show and set VPLEX CLI commands. VPLEX employs a Linux-based CLI therefore to simply list commands for example listing the storage arrays connected to VPLEX you would have to issue the following on the VPLEX CLI:

*Dell*

If you have a clustered Vplex Metro systems, the Vplexcli-init file will need to be updated on the management server at both Vplex cluster-1 and 2. You can define your own aliases for commands that you use frequently. EMC supplies the showarrays alias, and aliases for commonly used commands, in a rar file. See the EMC documentation for details. If you define the alias yourself as above it will work, but will not survive a management server reboot.
