"The Emergency
Response Guidebook
(ERG2008) was
developed jointly by the
US Department of
Transportation, Transport
Canada, and the
Secretariat of
Communications and

Transportation of Mexico (SCT) for use by firefighters, police, and other emergency services personnel who may be the first to arrive at the scene of a transportation incident involving a hazardous material. It is primarily a guide to aid first responders in (1) quickly identifying the specific or generic classification of the material(s) involved in the incident, and (2) protecting themselves and the general public during this initial response phase of the incident"--Home page of source document on the Internet.

2020 Emergency Response Guidebook Simon and Schuster

If you came upon an overturned truck on the highway that was leaking, would you be able to identify if it was hazardous and know what steps to take? Does

the identification number 60 indicate a toxic substance or a flammable solid, in the molten state at an elevated temperature? Does the identification number 1035 indicate ethane or butane? What is the difference between natural gas transmission pipelines and natural gas distribution pipelines? Questions like these and more are answered in the 2016 update of the Emergency Response Guidebook. Learn how to identify symbols for vehicles carrying toxic, flammable, explosive, radioactive, or otherwise harmful substances and how to respond once an incident involving those substances has been identified. Always be prepared in situations that are unfamiliar and dangerous and know how to rectify them. Keeping this guide around at all times will ensure that, if you were to come upon a transportation situation involving hazardous substances or dangerous goods, you will be able to help keep others and yourself out of danger. With color-coded pages for quick and easy reference, this is the official manual used by first

responders in the United States and Canada for transportation incidents involving dangerous goods or hazardous materials. Emergency Response Guidebook Us Department of Transportation PHMSA's 2016 Emergency Response Guidebook provides first responders with a go-to manual to help deal with hazmat transportation accidents during the critical first 30 minutes.

"Move aside, panda ...

Photographed here with affection and care, moon bears, also

known as Asiatic black bears, rival their Chinese cousins in childlike appeal." --The New

York Times Named 2013

Outstanding Science Trade Book for Students K-12 by the

National Science Teachers

Association and the Children's

Book Council "In the early

spring, when the snow was still

deep, in a den inside a big hollow tree, Yasha was born. There, he

and his mother lived, warm and

snug. But one day, hunters came

and Yasha's mother was gone."

So begins the true story of Yasha, an orphaned moon bear, and

how he was adopted into a brand new family. Left without his

mother in the Russian

wilderness, Yasha was scared and alone. Would he be an orphan

forever? Then, two young

scientists named Liya and Sergey

take him deep into the forest to

teach him how to live in the wild.

Yasha meets two more cubs,

Shum and Shiksha, and soon the

three bears are playing together like real brothers and sisters. The scientists protect their new family, but it is also their mission to raise the cubs to become wild bears with skills to survive on their own. Through heartwarming photographs of this unique rescue story, we watch Yasha learn and grow with his new family until he's finally ready to be on his own. Curious kids will also appreciate looking at the map of Yasha's homeland and places where other moon bears live, as well as learning interesting facts about them.
