High temperature electrolysis (HTE), which is the highly efficient

electrolysis of steam at high temperature and utilises the heat and electrical power supplied by advanced nuclear reactor, provides a very promising way for massive production of hydrogen in the future. This book provides an overview of HTE technology including its key characteristics and challenges of solid oxide electrolysis cell (SOEC) development. This book also examines the theory of electrical double layer, which is an essential electrochemical problem. The phenomenological theory of interfacial phenomena is also explored, with consideration of surface polarisation. Furthermore, the electrochemical reduction of nitrate has a great importance mainly for environmental and analytical purposes. This book provides a review of 225 papers dealing with the electrochemical reduction of nitrate. Other chapters introduce the application of electrochemical method for treatment of domestic wastewater and industrial wastewater, propose a novel point of view concerning some theoretical and practical aspects of isoelectric focusing, describe the electrochemical oxidation of strontium chloride (SrCl₂) to strontium chlorate employing a noble metal oxide coated anode and rotating stainless steel cathode, and report a preparation method suitable for requirements of industrial applications to graft active polymer films. Experimental studies on electrodeposition of silver-indium (Ag-In) alloys are also described, as well as the application of the electrochemical discharge phenomenon to synthetic chemistry, nanoparticle synthesis and micromachining.

An Ideal Husband is an 1895 stage play by Oscar Wilde that revolves around blackmail and political corruption, and touches on the themes of public and private honour. The action is set in London, in "the present", and takes place over the course of twenty-four hours. "Sooner or later," Wilde notes, "we shall all have to pay for what we do." But he adds that, "No one should be entirely judged by their past." Together with The Importance of Being Earnest, it is often considered Wilde's dramatic masterpiece. After Earnest, it is his most popularly produced play. The play opens during a dinner party at the home of Sir Robert Chiltern in

London's fashionable Grosvenor Square. Sir Robert, a prestigious member of the House of Commons, and his wife, Lady Chiltern, are hosting a gathering that includes his friend Lord Goring, a dandified bachelor and close friend to the Chilterns, Mabel Chiltern, and other genteel guests. During the party, Mrs. Cheveley, an enemy of Lady Chiltern from their school days, attempts to blackmail Sir Robert into supporting a fraudulent scheme to build a canal in Argentina. Apparently, Mrs. Cheveley's late mentor and lover, Baron Arnheim, induced the young Sir Robert to sell him a Cabinet secret - which enabled Arnheim to buy shares in the Suez Canal Company three days before the British government announced its purchase of the company. Arnheim's payoff was the basis of Sir Robert's fortune, and Mrs. Cheveley has Robert's letter to Arnheim as proof of his crime. Fearing the ruin of both career and marriage, Sir Robert submits to her demands.

In a city of chemical warehouses and entropic factories, viral DJ's and anarchist skatepunks share the streets with nihilistic video game junkies and makeshift revolutionaries, whilst pirate broadcasters battle against one another and renegade paramedics hijack the dead and dying for profit . . . Pretty Little Things to Fill Up the Void is the story of four characters and their constantly-intertwining lives as they search for meaning and purpose in a place that seems to deny either: Elisabeth Afterlife, a renegade documentarist, haunted by the ghost of a bloody girl; Catalina Rodriguez, a fiery teenager and thrill-seeker; and the artists-lovers Camille and Auguste. And alongside all of them there is the mysterious Shiva, lurking in her complex of workshops, and moving devious chemical hands that will soon encompass all of the characters in an explosive point of singularity . . .
