Forgiven - Colossians 2 No Starch Press

Instead of entering into a pointless debate on whether or not God exists, it is more important to bear in mind that belief in the existence of God has little bearing on making a person a good or a bad citizen. One can be a saintly person without believing in God and a detestable villain believing in Him. In my personalized religion, there is NO GOD! Khushwant Singh, over the decades, has built up a reputation for coming up with something new and controversial in each book, and he does not disappoint his readers this time too. He begins with a chapter on the 'need for a new religion - without God', in which he questions the relevance of God. He then moves on to describe how religion has proved to be more harmful than beneficial and, in the process, debunks astrologers and the breed of so-called 'godmen'. However, he is not dismissive of religion. Through his lucid writing, he brings out the beauty and significance of holy books such as the Bhagavad Gita, the Quran and the Granth Sahib. He provides relevant extracts to highlight the poetry and the music in such books. The author next tries to dispel the prejudices held by many non-Muslims against their Muslim compatriots by giving down-to-earth examples. He also emphasizes the importance of the Ramzaan fast. Khushwant Singh's description of the life and times of Guru Nanak and Guru Gobind Singh and his in-depth analysis of the Granth Sahib throw new light on a particularly troubled period in India's history. The chapter devoted to the interaction of the author (a confirmed agnostic) with the Dalai Lama (probably the world's most renowned spiritual leader) makes for fascinating reading. Here's one book containing a wealth of knowledge and information that you would want to read or consult again and again.

In the sequel to the #1 New York Times bestseller *Confessions of a Murder Suspect*, James Patterson keeps the confessions coming breathlessly as Tandy Angel delves deeper into her own tumultuous history-and proves that she can rise above the sordid Angel legacy. Wealthy young women are being murdered on Manhattan's exclusive Upper West Side, and the police aren't looking for answers in the right places. Enter Tandy Angel. The first case she cracked was the mystery of her parents' deaths. Now, while she's working to exonerate her brother of his glamorous girlfriend's homicide, she's driven to get involved in the West Side murder spree. One of the recent victims was a student at Tandy's own elite school. She has a hunch it may be the work of a serial killer, but the NYPD isn't listening to her...and Tandy can't ignore the disturbing fact that she perfectly fits the profile of the killer's targets. Can she untangle the mysteries in time? Or will she be the next victim?

High temperature electrolysis (HTE), which is the highly efficient electrolysis of steam at high temperature and utilises the heat and electrical power supplied by advanced nuclear reactor, provides a very promising way for massive production of hydrogen in the future. This book provides an overview of HTE technology including its key characteristics and challenges of solid oxide electrolysis cell (SOEC) development. This book also examines the theory of electrical double layer, which is an essential electrochemical problem. The phenomenological theory of interfacial phenomena is also explored, with consideration of surface polarisation. Furthermore,

the electrochemical reduction of nitrate has a great importance mainly for environmental and analytical purposes. This book provides a review of 225 papers dealing with the electrochemical reduction of nitrate. Other chapters introduce the application of electrochemical method for treatment of domestic wastewater and industrial wastewater, propose a novel point of view concerning some theoretical and practical aspects of isoelectric focusing, describe the electrochemical oxidation of strontium chloride (SrCl₂) to strontium chlorate employing a noble metal oxide coated anode and rotating stainless steel cathode, and report a preparation method suitable for requirements of industrial applications to graft active polymer films. Experimental studies on electrodeposition of silver-indium (Ag-In) alloys are also described, as well as the application of the electrochemical discharge phenomenon to synthetic chemistry, nanoparticle synthesis and micromachining.
