fourteen books on American history with a lucky strike but cascaded into and national parks Edwin Land had barely settled into his seat on the plane when the flash went off. An idea for an innovative WWII technology that might help eradicate the fascist cancer devouring the free world. It was Polaroid's Optical Ring Sight, which magically projected a bullseye of brilliantly colored rings onto the sky—like rings of fire—to aim American anti-aircraft guns that previously "couldn't hit the broad side of a barn." Rings of Fire is the compelling story of American ingenuity, determination, and grit—told through the personal stories of the amazing people who transformed insight into gunsight. From scientists to ordinary Americans to drifters and ex-cons characterized as "the underbelly of America," they crossed cultural barriers to tackle a shared crisis: California "desert rat" artist, John Hilton, whose mining claim supplied the calcite crystals desperately needed for the device, assisted by Gen. George S. Patton. Miners Steve Modesto and John Owens, a Cahuilla Indian ranch hand and a white meat-cutter from Kansas, whose friendship led to an astonishing discovery. Moonshiner Al Hansen, whose calcite prospecting in Montana started a wild-west vigilante showdown. "Crystal Crackin' Mama" Irene Frederick, whose calcite-crystal processing skills silenced male skeptics and helped rescue the Polaroid project from disaster. Edwin Stanton, whose hubris led to a fat FBI dossier and tragedy while prospecting in Mexico. Cecil Kegans, a rough Oklahoman with a huge smile, starting his Marine career by fetching groceries for calcite miners and ending it in a bloody pool on Saipan. And miner Harry Sikkenga, whose fist fight with a shift boss packed him off to the army artillery, just in time to invade Germany and encounter the horror of Dachau. Teamed together, they overcame enormous personal obstacles to produce ring sights for Navy ships, aircraft, and Army bazookas. And afterwards, their product went from aiming the guns of war to the cameras of peacetime—for television and on the helmets of skydiving videographers. And then, all the way to the moon, aiming NASA's space cameras, culminating with perhaps the most influential photograph of all time, Earthrise. Larry Hughes unfolds this gripping, never-told story with accessible explanations of the science and the art behind the project, but always

lets the colorful characters drive a warm and vivid adventure.

Houghton Mifflin Harcourt

Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced

undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

This third volume in the Media for All series offers a diverse selection of articles which bear testimony to the vigour and versatility of research and developments in audiovisual translation and media accessibility. The collection reflects the critical impact of new technologies on AVT, media accessibility and consumer behaviour and shows the significant increase in collaborative and interdisciplinary research targeting changing consumer perceptions as

well as quality issues.

Complementing newcomers such as crowdsourcing and potentially universal emoticons, classical themes of AVT studies such as linguistic analyses and corpus-based research are featured. Prevalent throughout the volume is the impact of technology on both methodologies and content. The book will be of interest to researchers from a wide range of disciplines as well as audiovisual translators, lecturers, trainers and students, producers and developers working in the field of language and media accessibility.

Ask a Manager

From the creator of the popular website Ask a Manager and New York's work-advice columnist comes a witty, practical guide to 200 difficult professional conversations—featuring all-new advice! There's a reason Alison Green has been called "the Dear Abby of the work world." Ten years as a workplace-advice columnist have taught her that people avoid awkward conversations in the office because they simply don't know what to say. Thankfully, Green does—and in this incredibly

helpful book, she tackles the tough discussions you may need to have during your career. You'll learn what to say when • coworkers push their work on you—then take credit for it • you accidentally trash-talk someone in an email then hit "reply all" • you're being micromanaged—or not being managed at all • you catch a colleague in a lie • your boss seems unhappy with your work • your cubemate's loud speakerphone is making you homicidal • you got drunk at the holiday party

Praise for Ask a Manager "A must-read for anyone who works . . . [Alison Green's] advice boils down to the idea that you should be professional (even when others are not) and that communicating in a straightforward manner with candor and kindness will get you far, no matter where you work." —Booklist (starred review) "The author's friendly, warm, no-nonsense writing is a pleasure to read, and her advice can be widely applied to relationships in all areas of readers' lives. Ideal for anyone new to the job market or new to management, or anyone hoping to improve their work experience." —Library Journal (starred review) "I am a huge fan of Alison Green's Ask a Manager column. This book is even better. It teaches us how to deal with many of the most

vexing big and little problems in our workplaces—and to do so with grace, confidence, and a sense of humor." —Robert Sutton, Stanford professor and author of The No Asshole Rule and The Asshole Survival Guide "Ask a Manager is the ultimate playbook for navigating the traditional workforce in a diplomatic but firm way." —Erin Lowry, author of Broke Millennial: Stop Scraping By and Get Your Financial Life Together
