Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it ' s practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle.

Centered Riding Routledge

Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better.

Likewar CRC Press

Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

Introduction to Information Retrieval BRILL

*Popular Science* Cambridge University Press  
Information Literacy in Music: An Instructor's Companion is a practical guide to information literacy instruction for busy librarians and music faculty. This book contains examples of course-integrated assignments designed to help postsecondary music students develop foundational skills in information literacy.

These assignments have been solicited from experienced librarians and faculty across the United States, and they represent a broad spectrum of approaches to music research, from historical to applied studies. Be inspired by new and creative solutions to students' information literacy challenges and by the many examples of successful collaborations between librarians and music faculty.

Aswath Damodaran, distinguished author, Professor of Finance, and David Margolis, Teaching Fellow at the NYU Stern School of Business, have delivered the newest edition of Applied Corporate Finance. This readable text provides the practical advice students and practitioners need rather than a sole concentration on debate theory, assumptions, or models. Like no other text of its kind, Applied Corporate Finance, 4th Edition applies corporate finance to real companies. It now contains six real-world core companies to study and follow. Business decisions are classified for students into three groups: investment, financing, and dividend decisions.

Extremophiles: Diversity, Adaptation and Applications SAGE

Now in its third edition, this classic book is widely considered the leading text on Bayesian methods, lauded for its accessible, practical approach to analyzing data and solving research problems. Bayesian Data Analysis, Third Edition continues to take an applied approach to analysis using up-to-date Bayesian methods. The authors—all leaders in the statistics community—introduce basic concepts from a data-analytic perspective before presenting advanced methods. Throughout the text, numerous worked examples drawn from real applications and research emphasize the use of Bayesian inference in practice. New to the Third Edition Four new chapters on nonparametric modeling Coverage of weakly informative priors and boundary-avoiding priors Updated discussion of cross-validation

---

and predictive information criteria Improved convergence monitoring and effective sample size calculations for iterative simulation Presentations of Hamiltonian Monte Carlo, variational Bayes, and expectation propagation New and revised software code The book can be used in three different ways. For undergraduate students, it introduces Bayesian inference starting from first principles. For graduate students, the text presents effective current approaches to Bayesian modeling and computation in statistics and related fields. For researchers, it provides an assortment of Bayesian methods in applied statistics. Additional materials, including data sets used in the examples, solutions to selected exercises, and software instructions, are available on the book's web page.

**Popular Mechanics** Simon and Schuster This third volume in the Media for All series offers a diverse selection of articles which bear testimony to the vigour and versatility of research and developments in audiovisual translation and media accessibility. The collection reflects the critical impact of new technologies on AVT, media accessibility and consumer behaviour and shows the significant increase in collaborative and interdisciplinary research targeting changing consumer perceptions as well as quality issues. Complementing newcomers such as crowdsourcing and potentially universal emoticons, classical themes of AVT studies such as linguistic analyses and

corpus-based research are featured. Prevalent throughout the volume is the impact of technology on both methodologies and content. The book will be of interest to researchers from a wide range of disciplines as well as audiovisual translators, lecturers, trainers and students, producers and developers working in the field of language and media accessibility.

*Popular Science* Rowman & Littlefield  
“An epic story, filled with an unfolding array of evocatively described landscapes and sharply drawn, unforgettable people.”  
—Dayton Duncan, writer and producer for Ken Burns documentary films and author of fourteen books on American history and national parks  
Edwin Land had barely settled into his seat on the plane when the flash went off. An idea for an innovative WWII technology that might help eradicate the fascist cancer devouring the free world. It was Polaroid's Optical Ring Sight, which magically projected a bullseye of brilliantly colored rings onto the sky—like rings of fire—to aim American anti-aircraft guns that previously “couldn't hit the broad side of a barn.” Rings of Fire is the compelling story of American ingenuity, determination, and grit—told through the personal stories of the amazing people who transformed insight into gunsight. From scientists to ordinary Americans to drifters and ex-cons characterized as “the underbelly of America,” they crossed cultural barriers to tackle a shared crisis: California “desert rat” artist, John Hilton, whose mining claim supplied the calcite crystals desperately needed for the device, assisted by Gen. George S. Patton. Miners Steve Modesto and John Owens, a Cahuilla Indian ranch hand and a white meat-cutter from Kansas, whose friendship led to an astonishing

---

discovery. Moonshiner Al Hansen, whose calcite prospecting in Montana started with a lucky strike but cascaded into a wild-west vigilante showdown. “Crystal Crackin’ Mama” Irene Frederick, whose calcite-crystal processing skills silenced male skeptics and helped rescue the Polaroid project from disaster. Edwin Stanton, whose hubris led to a fat FBI dossier and tragedy while prospecting in Mexico. Cecil Kegans, a rough Oklahoman with a huge smile, starting his Marine career by fetching groceries for calcite miners and ending it in a bloody pool on Saipan. And miner Harry Sikkenga, whose fist fight with a shift boss packed him off to the army artillery, just in time to invade Germany and encounter the horror of Dachau. Teamed together, they overcame enormous personal obstacles to produce ring sights for Navy ships, aircraft, and Army bazookas. And afterwards, their product went from aiming the guns of war to the cameras of peacetime—for television and on the helmets of skydiving videographers. And then, all the way to the moon, aiming NASA’s space cameras, culminating with perhaps the most influential photograph of all time, Earthrise. Larry Hughes unfolds this gripping, never-told story with accessible explanations of the science and the art behind the project, but always lets the colorful characters drive a warm and vivid adventure.

### *A Manual for Cleaning Women* Penguin

This book aims at describing the wide variety of new technologies and concepts of non-standard antenna systems –reconfigurable, integrated, terahertz, deformable, ultra-wideband, using metamaterials, or MEMS, etc, and how they open the way to a wide range of applications, from personal security and communications to multifunction radars and towed sonars, or satellite navigation systems, with space-time diversity on transmit and receive. A reference book for designers in this lively scientific community linking antenna experts and signal processing engineers.

### Rings of Fire

Social media has been weaponized, as state hackers and rogue terrorists have seized upon Twitter and Facebook to create chaos and destruction. This urgent report is required reading, from defense experts P.W. Singer and Emerson T. Brooking.

### Kaiulani

Young, Disabled and LGBT+ brings together the work of an international team interested in exploring the intersection of sexuality, gender identity, and disability in the lives of young people and aims to further develop this area as a distinct area of study. This volume features original research and writing into lives that are often misunderstood, marginalised and under-represented in research. It is framed with artwork, poetry and writing from young disabled LGBT+ people, and centralises the voices and lives of young disabled LGBT+ people throughout. Drawing from disciplines including: sociology, psychology, disability and youth studies, and with contributions from practitioners, it examines experiences and research from a number of perspectives, such as education, personal lives and activism. Featuring work from the UK, Canada, United States, India and Australia, it is a timely and topical book which will appeal to scholars particularly interested in

---

sexuality, gender, disability and youth studies; professionals within health, education, social work and youth work who aim to understand and support young disabled LGBT+ people; and young people themselves.
