The little black book of marketing is here. Marketing guru Peter Fisk's inspirational manual of marketing shows you how to inject marketing genius into your business to stand

out from the crowd and deliver exceptional results. Marketing Genius is about achieving genius in your business and its markets, through your everyday decisions and actions. It combines the deep intelligence and radical creativity required to make sense of, and stand out in today's markets. It applies the genius of Einstein and Picasso to the challenges of marketing, brands and innovation, to deliver exceptional impact in the market and on the bottom line. Marketers need new ways of thinking and more radical creativity. Here you will learn from some of the world's most innovative brands and marketers – from Alessi to Zara, Jones Soda to Jet Blue, Google to Innocent. Peter Fisk is a highly experienced marketer. He spent many years working for the likes of British Airways and American Express, Coca Cola and Microsoft. He was the CEO of the world's largest professional marketing organisation, the Chartered Institute of

Marketing, and lead the global marketing practice of PA Consulting Group. He writes and speaks regularly on all aspects of marketing. He has authored over 50 papers, published around the world, and is co-author of the FT Handbook of Management. "Marketers who want to recharge their left and right brains can do no better than read Marketing Genius. It's all there: concepts, tools, companies and stories of inspired marketers." —Professor Philip Kotler, Kellogg Graduate School of Management, and author of Marketing Management "A fantastic book, full of relevant learning. The mass market is dead. The consumer is boss. Imagination, intuition and inspiration reign. Geniuses wanted." —Kevin Roberts, Worldwide CEO Saatchi & Saatchi, and author of Lovemarks "This is a clever book: it tells you all the things you need to think, know and do to make money from customers and then calls you a genius for reading it." —Hamish Pringle, Director General of Institute of Practitioners in Advertising, and author of Celebrity Sells "This is a truly prodigious book. Peter Fisk is experienced, urbane and creative, all the attributes one would expect from a top marketer. The case histories in this book are inspirational and Peter's writing style is engaging and very much to the point. This book deserves a special place in the substantial library of books on marketing." —Professor Malcolm McDonald, Cranfield School of Management, and author of Marketing Plans "Customers, brands and marketing should sit at the heart of every business's strategy and performance today. Marketing Genius explains why this matters more than ever, and how to achieve it for business and personal success" —Professor John Quelch, Professor of Business Administration at Harvard Business School and author of New Global Brands "Marketing

Genius offers marketers 99% inspiration for only 1% perspiration." —Hugh Burkitt, CEO, The Marketing Society

This comprehensive and up-to-date book covers the common emergencies in neurology, neurosurgery, and psychiatry. Chapters examine a variety of neurological emergencies, and offer pragmatic approaches to treatment and management. High-quality tables, figures, and algorithms supplement expertly written text, and provide readers with clear, rapid answers in an easily accessible format. Additionally, the book includes discussions on less common conditions, and incorporates specific methods for treating specific populations, such as pregnant women and transplant patients. Neurological Emergencies: A Practical Approach is a go-to reference

for all medical professions working in emergency treatment settings, and will increase their ability to better care for patients with acute neurological diseases. Chemistry Springer

'Business Recoded is a great source of inspiration for leaders who want to explore, shape and prepare themselves for the future.' ALEXANDER OSTERWALDER, author of Business Model Generation and The Invincible Company 'It is not often that we have moments of magic in any business. What Peter has given us is more than just ideas and inspiration, but a whole way of thinking about how we could reinvent our future, and start making it happen tomorrow.' ALBERTO UNCINI-MANGANELLI, GM and SVP, Adidas 'With energy, enthusiasm and a deep reservoir of fantastic examples, Peter Fisk maps out what each of us needs to do in order to re-calibrate ourselves and our organizations to create the future. Business Recoded

is persuasive and compelling.' STUART CRAINER, founder, Thinkers50 'Peter Fisk ' s excellent new book, Business Recoded, will help ' recode ' your business by tapping into the minds of some of the world ' s most brilliant business leaders. It ' s a must-read for anyone in need of a quick fix of inspiration and tried-and-tested advice.' MARTIN LINDSTROM, author of Buyology and Small Data 'Peter Fisk is a terrific storyteller with an encyclopaedic grasp of best business practices across the globe. If you want to disrupt the future of your business, this book is your decoder ring.' WHITNEY JOHNSON, author of Disrupt Yourself 'A brilliant collection of practical guidelines intended to refresh and reinvent our mindsets, from a global thoughtful leader with vast experience in management development.' SANTIAGO INIGUEZ, President of IE University. 'Business Recoded is definitely a must-read for leaders that want to succeed with their organizations in our fast-changing world.' ANTONIO NIETO-RODRIGUEZ, author of The Project Revolution

Business needs a new code for success! Change is dramatic, pervasive and relentless. The challenges are numerous. The opportunities are greater. Incredible technologies and geopolitical shifts, complex markets and stagnating growth, demanding customers and disruptive entrepreneurs, environmental crisis and social distrust, unexpected shocks and uncertain futures. The old codes that got us here don't work anymore. Moving forwards needs a new mindset. Business Recoded is for business leaders who seek to progress in today ' s rapidly changing world, and to create the organisations that will thrive in tomorrow's world. It explores how to lead a better future, to reimagine your business, to reinvent markets, to energise your people. It describes how to combine profit with more purpose, intelligent technologies with creative people, radical innovation with sustainable impact. It dives deep into the minds of some of today's most inspiring business leaders - people like Anne Wojcicki and Jeff Bezos, Emily Weiss and Devi Shetty, Daniel Ek and Tan Le, Mary Barra and

Masayoshi Son, Satya Nadella and Zhang Ruimin. Learn from the innovative strategies of incredible companies — Alibaba and Amazon, Babylon and BlackRock, Meituan Dianping and Microsoft, Narayana Health and Netflix, Patagonia and PingAn, Spotify and Supercell, and many more. The book is built on 7 seismic shifts driving a more enlightened future of business, unlocking 49 codes that collectively define a new DNA for organisations and their leadership. It's about you — realising your future potential - by developing your own codes for more enlightened progress, personal and business success. Do you have the courage to create a better future, for you and your business?

Often considered the workhorse of the cellular machinery, proteins are responsible for functions ranging from molecular motors

to signaling. The broad recognition of their involvement in all cellular processes has led to focused efforts to predict their functions from sequences, and if available, from their structures. An overview of current research directions, *Computational Protein-Protein Interactions* examines topics in the prediction of protein-protein interactions, including interference with protein-protein interactions and their design. Explores *Computational Approaches to Understanding Protein-Protein Interactions* Outlining fundamental and applied aspects of the usefulness of computations when approaching protein-protein interactions, this book incorporates different views of the same biochemical problem from sequence to structure to energetics. It covers protein-protein

interaction prediction and dynamics, design, drug design for inhibition, and uses for the prediction of function. The text provides general chapters that overview the topic and also includes advanced material. The chapters detail the complexity of protein interaction studies and discuss potential caveats. Addresses the Next Big Problem in Molecular Biology While it is important to predict protein associations, this is a daunting task. Edited by two experts in the field and containing contributions from those at the forefront of research, the book provides a basic outline of major directions in computational protein-protein interactions research at the heart of functional genomics and crucial for drug discovery. It addresses the next big problem in molecular biology: how to

create links between all the pieces of the cell jigsaw puzzle.

Creating innovative strategies for business and brands Academic Press

The new global cancer data suggests that the global burden has risen to 18.1 million new cases per year and 9.6 million cancer deaths per year. A number of factors appear to be driving this increase, in particular, a growing and aging global population and an increase of exposure to cancer risk factors linked to social and economic development. For rapidly-growing economies, the data suggests a shift from poverty- or infection-related cancers to those associated with lifestyles more typical in industrialized countries. There is still large geographical diversity in cancer occurrence and variations in the magnitude

and profile of the disease between and within world regions. There are specific types of cancer that dominate globally: lung, female breast and colorectal cancer, and the regional variations in common cancer types signal the extent to which societal, economic and lifestyle changes interplay to differentially impact on the profile of this most complex group of diseases. Unfortunately, despite advances in cancer care, a significant proportion of patients at home, experience sub-optimal outcomes. Barriers to successful treatment outcomes include, but are not limited to: access to oncologists in the primary health centers, non-adherence, lack of experienced oncology and palliative care nurses in the community, inadequate monitoring and the lack of training of family

and pediatric physicians. Telemedicine approaches, including telephone triage/education, telemonitoring, teleconsultation and status tracking through mobile applications, have shown promise in further improving outcomes, in particular for chronic cancer patients following their hospitalization. Lessons can be learned from existing hospices in North America, the United Kingdom, Australia, Centers of Excellence in African (Uganda) and modern community services in India (Kerala). An important goal of this book is to describe and encourage professionals to develop new community programs in palliative care, which include training and empowering physicians and nurses in the community on the principles of palliative care. The Middle East Cancer Consortium (MECC) together with the American Society of Clinical Oncology (ASCO) and the American Oncology Nursing Society (ONS) have conducted multiple courses ranging from basic palliative care to more specialized training in palliative care for multiple nationalities in Europe, Asia and Africa. Our experience clearly indicates that, to promote such activities, one needs strong leadership and confirmed political will to support the endeavor. The new book will emphasize the importance of having a core of multiple stakeholders including community leaders, government, NGOs and media to be actively involved in advocating for the cause and generating public awareness. This text will provide the reader with a comprehensive understanding of the outside-of-the-hospital

treatment of cancer patients by medical, paramedical and volunteer personnel. In doing so, this text will encourage the creation of new palliative care services improving upon the existing ones and stimulate further research in this field. Part 1 of the text will begin with an overview of the current state of affairs of services provided to cancer patients while being cared for by primary health centers. It will also review the current literature regarding medical and psychological-based therapy options in the community for cancer patients at different stages of their disease. Part 2 will address the unique role of the community nurse, within the framework of the multidisciplinary team treating the patient, in the attempt to provide optimal evaluation and care in very challenging situations (such as with terminal patients). Part 3 will provide insightful models of this new discipline and serve as a valuable resource for physicians, nurses, social workers and others involved in the care of cancer patients. The book will take a multidisciplinary approach, integrating clinical and environmental data for practical management to enhance the efficacy of treatment while relieving suffering. Part 4 will also discuss the application of modern technological approaches to track symptoms, quality of life, diet, mobility, duration of sleep and medication use (including pain killers) in chronic cancer patients in the community. Part 5 of the book will also be devoted to modes of developing a collaborative program between governmental and non-governmental organization sectors. This includes volunteer

workers in close collaboration with medical professionals for providing emotional and spiritual support, nursing care, nutritional support and empowering family caregivers. Such a model makes palliative care in the community a “ people ’ s movement ” , thus transferring part of the responsibility and ownership to the community.

This book constitutes the refereed proceedings of the 8th International Conference on Web Reasoning and Rule Systems, RR 2014, held in Athens, Greece in September 2014. The 9 full papers, 9 technical communications and 5 poster presentations presented together with 3 invited talks, 3 doctoral consortial papers were carefully reviewed and selected from 33 submissions. The conference covers a wide range of the following: semantic Web, rule and ontology languages, and related logics, reasoning, querying, searching and optimization,

This book is devoted to students, PhD students, postgraduates of electrical engineering, researchers, and scientists dealing with the analysis, design, and optimization of electrical machine properties. The purpose is to present methods used for the analysis of transients and steady-state conditions. In three chapters the following methods are presented: (1) a method in which the parameters (resistances and inductances) are calculated on the basis of geometrical dimensions and material properties made in the design process, (2) a method of general theory of electrical machines, in which

incompleteness, inconsistency and uncertainty, non-monotonic, common sense, and closed-world reasoning for the web, dynamic information, stream reasoning and complex event processing, decision making, planning, and intelligent agents, machine learning, knowledge extraction and information retrieval, data management, data integration and reasoning on the web of data, ontology-based data access, system descriptions, applications and experiences.

Explains the fundamentals and practical applications of flat and flexible OLEDs for displays and lighting Organic light-emitting diodes (OLEDs) have emerged as the leading technology for the new display and lighting market. OLEDs are solid-state devices composed of thin films of organic molecules that create light with the application of electricity. OLEDs

can provide brighter, crisper displays on electronic devices and use less power than conventional light-emitting diodes (LEDs) or liquid crystal displays (LCDs) used today. This book covers both the fundamentals and practical applications of flat and flexible OLEDs. Key features: Covers all of the aspects necessary to the design and manufacturing of OLED displays and lighting. Explains the fundamental basic technologies and also related technologies which might contribute to the next innovation in the industry. Provides several indications for future innovation in the OLED industry. Includes coverage of OLED vacuum deposition type and solution type materials. The book is essential reading for early career engineers developing OLED devices and OLED related technologies in industrial companies, such as OLED device fabrication companies.

Declared a triumph by the New York Times

Book Review, Linda Greenlaw's first book, *The Hungry Ocean*, appeared on nearly every major bestseller list in the country. Now, taking a break from the swordfishing career that earned her a major role in *The Perfect Storm*, Greenlaw returns to Isle au Haut, a tiny Maine island with a population of 70 year-round residents, 30 of whom are Greenlaw's relatives. With a Clancy-esque talent for fascinating technical detail and a Keillor-esque eye for the drama of small-town life, Greenlaw offers her take on everything from rediscovering home, love, and family to island characters and the best way to cook and serve a lobster. But Greenlaw also explores the islands darker side, including a tragic boating accident and a century-old conflict with a neighboring community. Throughout, Greenlaw maintains the straight-shooting, funny, and slightly scrappy style that has won her so many fans, and proves once

again that fishermen are still the best storytellers around.
