Christopher I. Beckwith, professor of Central Eurasian studies at Indiana University, suggests in his recent book, *Empires of the Silk Road* (Princeton University Press), that 'the most crucial element' of societies all through Central Eurasia--including the ones analyzed by this exhibition--was the 'sociopolitical-religious ideal of the heroic lord' and of a 'war band of his friends' that was attached to him and 'sworn to defend him to the death.' This idea, he suggests, affected the ...

Empire of the Silk Road is by no means tedious. In spite of its involved details and not so wild digressions, it can be easy to understand to just about anyone. That is if you possess a background in world history and different languages. This two can enable you to cope with the authors mix of grounded contrarianism and speculation.

A book review by Danny Yee © 2011
<http://dannyreviews.com/>. Beckwith is a historian of the old school, trained in philology and careful analysis of sources; he is also rather biased, entirely unsystematic, and idiosyncratic in the extreme.

Empires of the Silk Road is gloriously erudite and digressive, offering some unusual ideas and perspectives, but it needs to be read with care.
