Rethink, Redesign, Reboot. Most people associate performance management with the annual review, which is universally dreaded by employees, management, and HR professionals alike. It's a cookie-cutter, fear-based, top-down approach that emphasizes negatives over positives and stifles healthy career conversations. It's never been shown to motivate anyone to do anything but try to avoid it, but nobody feels like they have any alternative. Tamra Chandler has one—and it works. Actually, Chandler doesn't offer a single alternative—she offers an infinite number of them. Each organization that uses her Performance Management Reboot is able to develop its own unique version since it doesn't make a lot of sense for organizations with different cultures, in different industries and sectors, to do things exactly the same way. Grounded in the latest scientific findings about motivation, it's a transparent, employee-driven process that values collaboration over competition and rewards people for acquiring new skills and increasing their contribution instead of hitting arbitrary benchmarks. Chandler lays out the general principles and then walks you through each step in creating a performance management process that employees will actually embrace rather than avoid and that will help you meet the three objectives of great performance management: developing your people, rewarding them equitably, and driving your organization's performance. It's the first comprehensive, step-by-step guide to creating a performance management solution that's tailored to your organization's needs and goals and that places the emphasis squarely on your greatest asset: your people.

Information Communication Technologies: Concepts, Methodologies, Tools, and Applications Atlantic Publishing Company

This edited volume focuses on innovative solutions to the debate on human thriving in the fast emerging technology-driven cyber-physical work context, also called Industry 4.0. The volume asks the important question: How can people remain relevant and thrive in workplaces that are increasingly virtual, technology-driven, and imbued with artificial intelligence? This volume includes two major streams of discussion: it provides multidisciplinary perspectives on what thriving could mean for individuals, managers and organisations in current and future non-linear and Web-driven workspaces. In this context, it points to the need to rethink the curricula of the psychology of human thriving so that it is applicable to Industry 4.0. Second, it discusses the new platforms of learning opening up in organisations and the ways and means with which people's learning practices can be adapted to changing scenarios. Some of these scenarios are: changing job designs and talent requirements; the demand for creativity; the need for virtual teams and intercultural collaborations; and changing emotional competencies. This topical volume includes contributions by scholars from across the world, and is of interest to scholars, practitioners and postgraduate students of psychology, organizational behaviour and human resource management.
