Springer
REA's EMT
Crash Course®
is the only book of its kind for the last-minute studier or any prospective Emergency Medical Technician who wants a quick refresher before taking the NREMT Certification

Exam. Targeted, Focused Review - Study Only What You Need to Know Written by an EMS Program Director and NREMT paramedic with 30 years of experience, EMT Crash Course® relies on the author's careful analysis of the exam's content and actual test questions. It covers only the information tested on the exam, so you can make the most of your valuable study time. Our fully indexed targeted review covers all

the official test categories including airway, ventilation, oxygenation, trauma, cardiology, medical, and EMS operations and is packed with practice questions and answers at the end of each chapter. Also included are tips and insights on résumé building, information on finding additional training opportunities, and more. Expert Test-taking Strategies Our experienced EMT author explains the

structure of the NREMT Certification Exam, so you know what to expect on test day. He also shares detailed question-level strategies and shows you the best way to answer questions. By following our expert tips and advice, you can score higher on every section of the exam. Must-know Key Terms Knowing the right medical terminology can make a real difference in your test score. That's why we cover

more than 400 EMT terms you need to know before you take your exam. Full-length Online Practice Exam The book comes with a true-to-format online practice test with diagnostic feedback, topic-level scoring, and detailed answer explanations to help students gauge their test-readiness. No matter how or when you prepare for the EMT exam, REA's EMT Crash Course® will show you how to study

efficiently and strategically, so you can get a great score!-- EMT Exam Prep Jones & Bartlett Learning Take the EMT-Basic Written Exam with confidence, so you can embark upon a rewarding career in the Emergency Medical Services. This online practice test will help you achieve the score you need. Paramedic Care Vol 1 Irm Vol 1 Sup Jones & Bartlett Publishers A true account of going through UCLA 's famed Daniel Freeman Paramedic Program—and practicing emergency medicine on the streets of Los Angeles.

Nine months of tying tourniquets and pushing new medications, of IVs, chest compressions, and defibrillator shocks—that was Kevin Grange’s initiation into emergency medicine when, at age thirty-six, he enrolled in the “Harvard of paramedic schools”: UCLA’s Daniel Freeman Paramedic Program, long considered one of the best and most intense paramedic training programs in the world. Few jobs can match the stress, trauma, and drama that a paramedic calls a typical day at the office, and few educational settings can match the pressure and competitiveness of paramedic school. Blending months of classroom instruction

with ER rotations and a grueling field internship with the Los Angeles Fire Department, UCLA’s paramedic program is like a mix of boot camp and med school. It would turn out to be the hardest thing Grange had ever done—but also the most transformational and inspiring. An in-depth look at the trials and tragedies that paramedic students experience daily, *Lights and Sirens* is ultimately about the best part of humanity—people working together to help save a human life.

About the Author
Dr. Christopher Coughlin is the EMS Program Director for Glendale

Community College in Glendale, Arizona. Dr. Coughlin has been an NREMT paramedic since 1991 and was one of the first 850 nationally certified flight paramedics (FP-C) in the United States. Dr. Coughlin earned his AAS in Advanced Emergency Medical Technology from Glendale Community College; his B.A. in Adult Education from Ottawa University, Phoenix, Arizona; his M.Ed. in Educational Leadership from Northern Arizona University, Flagstaff, Arizona, and his Ph.D. in

Professional Studies from Capella University, Minneapolis, Minnesota.

Focused Prep for the NREMT Cognitive Exam

Peterson's This new book provides a comprehensive review of material covered in both the EMT-I and Paramedic national standard curricula. More than 1600 questions consist of multiple choice, fill-in-the-blank, and discussion questions. Fifty illustrations form the basis

for certain questions within the book. Other questions are written in a scenario-based format. This is the only review book to cover both intermediate and paramedic certification. Numerous scenario-based questions let students solve real-life problems. Questions are grouped by subject within each chapter, allowing students to test their knowledge of particular subjects without having to wade through

unrelated questions. Comprehensive rationales help students understand why a particular answer is right or wrong; the rationales provide additional instruction and review. Answer sections are clearly marked with solid bars along the page margin, helping students find the answers quickly. A sample final exam covers information from all areas of the US DOT curriculum and prepares students for certification.

Part I of Peterson's Master the EMT-Basic Certification Exam: All About the EMT provides general information about life as an EMT and how to prepare for the EMT-Basic Certification Exam. It contains what you need to

know to jump start your career as an EMT. Peterson's Master the EMT-Basic Certification Exam will prepare you for a career answering calls for help and dedicated to saving lives. For more information see Peterson's Master the EMT-Basic Certification Exam. Master the EMT-Basic Certification Exam EduGorilla The evolving field of emergency medical services (EMS) requires professional

educators who are knowledgeable about teaching and learning strategies, classroom management, assessment and evaluation, technology in learning, legal implications in education, program infrastructure design, and administering programs of excellence to meet state and national accreditation guidelines. Foundations of Education: An EMS Approach, Third Edition, provides EMS educators with the tools, ideas, and information necessary to succeed in each of

these areas. The content reflects how current educational knowledge and theory uniquely apply to EMS students, educators, and programs. This textbook is used in the NAEMSE Instructor Courses, and is an excellent reference for all EMS educators, as well as educators in allied health professions. Evidence-Based Content In addition to foundational topics such as teaching philosophy and classroom management, the text covers brain-based learning, accreditation and

program evaluation, emerging technologies, and assessment strategies. It guides educators to write objectives, prepare lesson plans, and deliver education in engaging ways to maximize student learning. Grounded in this information, EMS educators can promote effective education regardless of the type of course or setting. Highlights

- Covers current educational theory and teaching methodologies specific to EMS
- Meets and exceeds the latest DOT National Guidelines for Educating EMS

Instructors -Offer practical advice and scenarios in the form of Teaching Tips and Case in Points

EMT-B National Standards Review Self-Test Research & Education Assoc. The manuscript reflects on the extent to which COVID-19 influenced the education system in Africa, notably South Africa. The purpose was to document lessons learned to inform decision-making and practice while drawing conclusions for future usage.

th This volume contains the papers presented at the 8 International Conference on - vanced Parallel Processing Technologies, APPT 2009. This series of conferences originated from collaborations between researchers from China and Germany and has evolved into an international conference for reporting advances in parallel processing technologies. APPT 2009 addressed the entire gamut of related topics, ranging from the architectural aspects of parallel

computer hardware and system software to the applied technologies for novel applications. For this conference, we received over 76 full submissions from researchers all over the world. All the papers were peer reviewed in depth and qualitatively graded on their relevance, originality, significance, presentation, and the overall appropriateness for their acceptance. Any concerns raised were discussed by the Program Committee. The Organizing Committee did an excellent job in selecting 36

papers for presentation. In short, the papers included here represent the forefront of research from China, Switzerland, Germany, and other countries.
