Cognitive Theory: Explains the difference between enactive and vicarious

learning. ENACTIVE LEARNING Learning by observing other people or

modeling.

enactive learning user guide

Enactive (0 - 1 year). Enactive (0 - 1 year). The first kind of memory. This mode is

used within the first year of life (corresponding with Piaget ' s sensorimotor

stage). Thinking is based entirely on physical actions, and infants learn by doing,

rather than by internal representation (or thinking).. It involves encoding physical

action based information and storing it in our memory.

This thesis investigated the application of enactive principles to the design of

classroom technolo- gies for young children ' s learning through play. This study

identified the attributes of an enactive pedagogy, in order to develop a design

framework to accommodate enactive learning processes. From an enactive

perspective, the learner is defined as an autonomous agent, capable of adapta- tion

via the recursive consumption of self generated meaning within the constraints of a

Enactive Learning User Guide - [logisticsweek.com](#)

Enactive representation is a kinesthetic learning experience. For example

young learners may use manipulatives in their math classes to understand the

concept of fractions. This tactile experience allow learners to see and feel

objects to understand basic concepts rather than memorizing the procedures.
