In New York Times bestseller Steve Berry's next Cotton Malone adventure, one by one the seven precious relics of the Arma Christi, the weapons of Christ, are disappearing from sanctuaries across the world. After former Justice Department agent Cotton Malone witnesses the theft of one of them, he learns from his old boss, Stephanie Nelle, that a private auction is about to be held where incriminating information on the president of Poland will be offered to the highest bidder—blackmail that both the United States and Russia want, but for vastly different reasons. The price of admission to that auction is one of the relics, so Malone is first sent to a castle in Poland to steal the Holy Lance, a thousand-year-old spear sacred to not only Christians but to the Polish people, and then on to the auction itself. But nothing goes as planned and Malone is thrust into a bloody battle between three nations over information that, if exposed, could change the balance of power in Europe. From the tranquil canals of Bruges, to the elegant rooms of Wawel Castle, to deep beneath the earth into an ancient Polish salt mine, Malone is caught in the middle of a deadly war—the outcome of which turns on a secret known as the Warsaw Protocol.

National Book Award Finalist: "This man's ideas may be the most influential, not to say controversial, of the second half of the twentieth century."—Columbus Dispatch At the heart of this classic, seminal book is Julian Jaynes's still-controversial thesis that human consciousness did not begin far back in animal evolution but instead is a learned

process that came about only three thousand years ago and is still developing. The implications of this revolutionary scientific paradigm extend into virtually every aspect of our psychology, our history and culture, our religion—and indeed our future. "Don't be put off by the academic title of Julian Jaynes's *The Origin of Consciousness in the Breakdown of the Bicameral Mind*. Its prose is always lucid and often lyrical...he unfolds his case with the utmost intellectual rigor."—The New York Times "When Julian Jaynes . . . speculates that until late in the twentieth millennium BC men had no consciousness but were automatically obeying the voices of the gods, we are astounded but compelled to follow this remarkable thesis."—John Updike, *The New Yorker* "He is as startling as Freud was in *The Interpretation of Dreams*, and Jaynes is equally as adept at forcing a new view of known human behavior."—*American Journal of Psychiatry*

It's the end of the world as we know it . . . The stakes are higher than ever for Adam Adler, and he will be put to the test in a way he never imagined. Taken by a flying reptile with wings as big as a bus to the farthest reaches of Siberia, Adam once again finds himself at the center of a plot to take down the evil organization Geneflow, who plan to create an apocalypse, ending life on earth as we know it, in order to create a world of hyper-evolved beings. Adam will have to join forces with a deadly pterosaur named Keera, and with the help of his old friend Zed, they'll need to risk everything to stop Geneflow once and for all and restore order to the world. This companion to *Z.Rex* and *Z.Raptor* once again brings dinosaurs colliding with modern society in an action-packed thriller perfect for fans of *Alex Rider* or *Jurassic Park*.

The Other End of the Spear David C Cook

After decades of internecine warfare, the tribes of the Tiste Edur have at last united under the Warlock King of the Hiroth. There is peace--but it has been exacted at a terrible price: a pact made with a hidden power whose motives are at best suspect, at worst, deadly. To the south, the expansionist kingdom of Lether, eager to fulfill its long-prophesized renaissance as an Empire reborn, has enslaved all its less-civilized neighbors with rapacious hunger. All, that is, save one--the Tiste Edur. And it must be only a matter of time before they too fall--either beneath the suffocating weight of gold, or by slaughter at the edge of a sword. Or so destiny has decreed. Yet as the

two sides gather for a pivotal treaty neither truly wants, ancient forces are awakening. For the impending struggle between these two peoples is but a pale reflection of a far more profound, primal battle--a confrontation with the still-raw wound of an old betrayal and the craving for revenge at its seething heart. The only thing bringing her comfort is knowing how much worse her friends are eventually going to feel about their betrayal.

Fathers of Influence Minotaur Books

This book looks at several troop categories based on primary function and analyzes the ratio between these categories to develop a general historical ratio. This ratio is called the Tooth-to-Tail Ratio. McGrath's study finds that this ratio, among types of deployed US forces, has steadily declined since World War II, just as the nature of warfare itself has changed. At the same time, the percentage of deployed forces devoted to logistics functions and to base and life support functions have increased, especially with the advent of the large-scale use of civilian contractors. This work provides a unique analysis of the size and composition of military forces as found in historical patterns. Extensively illustrated with charts, diagrams, and tables. Men are four times as likely to take their own lives, make up 95% of the prison population, in the case of boys they severely lag behind girls in the education stakes (and the gap is widening), and are nine times as likely to be separated from their children. And that's not even to mention the countless other existential, professional, spiritual, social, familial, and physical crises that afflict so many men today. Where did it all go so wrong? This book answers these and many more questions concerning what it's like to be a man.

When it comes to pop culture, Alfred Bester (1913-1987) is something of an unsung hero. He wrote radio scripts, screenplays, and comic books (in which capacity he created the original Green Lantern Oath). But Bester is best known for his science-fiction novels, and *The Stars My Destination* may be his finest creation. With its sly potshotting at corporate skullduggery, *The Stars My Destination* seems utterly contemporary, and has maintained its status as an underground classic for fifty years. (Bester fans should also note that iBooks has reprinted *ReDemolished*, which won the very first Hugo Award in 1953.)

Great new novel from Aaron Dembski-Bowden chronicling the story of the Emperor's Spears, a Space Marine Chapter on the edge of destruction, last watchmen over the Elara's Veil nebula. Now, the decisions of one man, Amadeus Kaias Incarius of the Mentor Legion, will determine the Chapter's fate... The scattered worlds of the Elara's Veil nebula were once protected by the oath of unity sworn by three mighty Chapters of the Adeptus Astartes. The Star Scorpions were undone by flaws in their genetic coding. The Celestial Lions were ravaged by the Inquisition for sins they did not commit. Now, after hundreds of years, only the Emperor's Spears still keep their vigil. They are barbarian watchmen against the Outer Dark; bloodied but unbroken in their long duty. Amadeus Kaias Incarius, a brother of the Mentor Legion, is commanded to cross the Great Rift and assess the Spears' war-readiness, only to be drawn into the chaotic plight of a depleted crusade on the Imperium's benighted frontier. The decisions he makes, far from the God-Emperor's light, will decide the fate of the war-torn Chapter.

Leah Unveiled International Adventure

The inspiring true story of a US Special Forces soldier who was medically retired after stepping on an IED, and his incredible return to active duty. Sergeant First Class (SFC) Ryan Hendrickson is a brave, determined, and courageous soldier -- a Green Beret clearing the way for his twelve-man team while conducting combat operations against the Taliban. As the "tip of the spear," his role is to ensure the route taken by U.S. and Afghan troops are free of IEDs -- improvised explosive devices. Many soldiers do not survive their last step; those who do often lose at least one limb. While rescuing an Afghan soldier outside a mud-hut compound in 2010 -- knowing that he was in "uncleared" territory -- Ryan stepped on an IED with his right foot. The device exploded, leaving his foot dangling at the end of his leg. American soldiers losing a limb is an all-too-common occurrence. But what makes Ryan's story different is that after undergoing two dozen surgeries and a tortuous rehabilitation, he was medically retired but fought to return to active duty. Multiple skin grafts to his leg and right foot successfully reattached his lower leg, and he was aided in his

recovery by wearing a new prosthetic device known as an IDEO (Intrepid Dynamic Exoskeletal Orthosis). Once he passed a series of crucial physical tests, Ryan was able to rejoin the Green Berets within a year and physically perform his duties, redeploying to Afghanistan in March 2012. In 2016, he volunteered to return to Afghanistan with Bravo Company, 2nd Battalion, 7th Special Forces Group. During a firefight with the Taliban, he risked his life under heavy enemy fire to rescue three Afghan soldiers cut off from friendly forces and return the bodies of two dead Afghan soldiers under the ethos that "no one gets left behind." For his heroic efforts on the battlefield, SFC Ryan Hendrickson was awarded a Silver Star, the nation's third-highest award for valor. An engaging and harrowing account, *Tip of the Spear* tells the amazing story of one Green Beret's indomitable spirit.

Generate Better, Faster Results— Using Less Capital and Fewer Resources! “ [The High-Velocity Edge] contains ideas that form the basis for structured continuous learning and improvement in every aspect of our lives. While this book is tailored to business leaders, it should be read by high school seniors, college students, and those already in the workforce. With the broad societal application of these ideas, we can achieve levels of accomplishment not even imagined by most people.” The Honorable Paul H. O’Neill, former CEO and Chairman, Alcoa, and Former Secretary of the Treasury “ Some firms outperform competitors in many ways at once—cost, speed, innovation, service. How? Steve Spear opened my eyes to the secret of systemizing innovation: taking it from the occasional, unpredictable ‘ stroke of genius ’ to something you and your people do month-in, month-out to outdistance rivals.”

Scott D. Cook, founder and Chairman of the Executive Committee, Intuit, Inc. “ Steven Spear connects a deep study of systems with practical management insights and does it better than any organizational scholar I know. [This] is a profoundly important book that will challenge and inspire executives in all industries to think more clearly about the technical and social foundations of organizational excellence.” Donald M. Berwick, M.D., M.P.P., President and CEO, Institute for Healthcare Improvement About the Book How can some companies perform so well that their industry counterparts are competitors in name only? Although they operate in the same industry, serve the same market, and even use the same suppliers, these extraordinary, high-velocity organizations consistently outperform all the competition—and, more importantly, continually widen their leads. In *The High-Velocity Edge*, the reissued edition of five-time Shingo Prize winner Steven J. Spear ’ s critically acclaimed book *Chasing the Rabbit*, Spear describes what sets market-dominating companies apart and provides a detailed framework you can leverage to surge to the lead in your own industry. Spear examines the internal operations of dominant organizations across a wide spectrum of industries, from technology to design and from manufacturing to health care. While he investigates several great operational triumphs, like top-tier teaching hospitals ’ fantastic improvements in quality of care, Pratt & Whitney ’ s competitive gains in jet engine

design, and the U.S. Navy ’ s breakthroughs in inventing and applying nuclear propulsion, *The High-Velocity Edge* is not just about the adoration of success. It also takes a critical look at some of the operational missteps that have humbled even the most reputable and respected of companies and organizations. The decades-long prominence of Toyota, for example, is contrasted with the many factors leading to the automaker ’ s sweeping 2010 product recalls. Taken together, these multiple perspectives and in-depth case studies show how to: Build a system of “ dynamic discovery ” designed to reveal operational problems and weaknesses as they arise Attack and solve problems when and where they occur, converting weaknesses into strengths Disseminate knowledge gained from solving local problems throughout the company as a whole Create managers invested in developing everyone ’ s capacity to continually innovate and improve Whatever kind of company you operate— from technology to finance to healthcare— mastery of these four key capabilities will put you on the fast track to operational excellence, where you will generate faster, better results—using less capital and fewer resources. Apply the lessons of Steven J. Spear and gain a high-velocity edge over every competitor in your industry.

End of the Spear McClelland & Stewart Limited

In January of 1956, five young evangelical missionaries were speared to death by a band of the Waorani people in the Ecuadorian Amazon. Two years later, two missionary women--the widow of one of the slain men and the sister of another--with the help of a Wao woman were able to establish peaceful relations with the same people who had killed their loved ones. The highly publicized deaths of the five men and the subsequent efforts to Christianize the Waorani quickly became the defining missionary narrative for American evangelicals during the second half of the twentieth century. *God in the Rainforest* traces the formation of this story and shows how Protestant missionary work among the Waorani came to be one of the missions most celebrated by Evangelicals and most severely criticized by anthropologists and others who accused missionaries of destroying the indigenous culture. Kathryn T. Long offers a study of the complexities of world Christianity at the ground level for indigenous peoples and for missionaries, anthropologists, environmentalists, and other outsiders. For the first time, Long brings together these competing actors and agendas to reveal one example of an indigenous people caught in the cross-hairs of globalization.

Bill is an IT manager at Parts Unlimited. It's Tuesday morning and on his drive into the office, Bill gets a call from the CEO. The company's new IT initiative, code named Phoenix Project, is critical to the future of Parts Unlimited, but the project is massively over budget and very late. The CEO wants Bill to report directly to him and fix the mess in ninety days or else Bill's entire department will be outsourced. With the help of a prospective board member and his mysterious philosophy of *The Three Ways*, Bill starts to see that IT work has more in common with manufacturing plant work than he ever imagined. With the clock ticking, Bill must organize work flow, streamline interdepartmental communications, and effectively serve the other

business functions at Parts Unlimited. In a fast-paced and entertaining style, three luminaries of the DevOps movement deliver a story that anyone who works in IT will recognize. Readers will not only learn how to improve their own IT organizations, they'll never view IT the same way again.
