Excel Maths: Whole Numbers, Decimals, Percentages and Fractions is designed for students in Year 7 who require extra attention in their Basic Number Skills. To be successful in mathematics, students must have a solid foundation in place for their high school maths to build on. These skills include a firm understanding of basic number work without reliance on calculators. This book looks at the important number skills for Year 7 and provides clearly set out explanations and examples for both students and parents to follow. Practice questions are then provided to build the confidence of the student. In this book you will find: self-contained units of work with hundreds of practice questions tests at the start of each unit to identify any problem areas step-by-step worked examples review tests for each unit, and two end-of-year tests, allowing students to monitor their progress answers to all questions Author: Allyn Jones

Screening and Assessment Procedures McGraw-Hill Education (UK)

This book describes maker culture as it is manifested in particular socio-cultural contexts, and describes some of the underlying narratives behind the emergence of such cultures and hackerspaces.

With reference to case studies, it invites a recasting of long-standing academic notions of industrialization, industrial location, urbanization, and regional divides. The volume approaches this emergent socio-cultural phenomenon from an academic perspective, and, as such, differs from existing studies in this field as it is the first to approach maker culture and makerspaces by tracing trajectories from academic literature. This will provide teachers and researchers with a more grounded foundation upon which to base their own work in this nascent, yet rapidly growing, field.

The first 8 books of a new range (*The World Of...*), covering core curriculum topics in KS3 English, Maths, Science and French. Ideas are placed within the context of real-life scenarios to make the topics relevant and interesting. At Year 7, the contexts are introduced by four characters, whilst at Year 9 they use real-life examples to make the topics relevant and memorable. This approach reflects the emphasis in schools towards more contextualized-learning, i.e. learning about things within a relevant situation. Engaging, full-colour, content-rich spreads also include 'top tips' and 'did you know' features at Year 7, whilst at Year 9 there are 'examiner's tips' and 'key fact' panels to help prepare students for end of year 9 SATs. There are also end of section revision spreads, comprising a mixture of short answer and structured questions to recap and revise what's been learnt so far.

A Complete Manual to Identifying and Diagnosing Mathematical Difficulties Letts and Lonsdale

Why do so many pupils in Years 7, 8 and 9 'switch off' and make very little progress in the core subjects such as English and mathematics? What can teachers and schools do to improve pupils' attitudes and motivation? Maurice Galton and his team have collected examples from various schools of what works in re-energising demotivated pupils. This book presents practical advice and strategies for improving lower secondary school classrooms, ranging from reducing class size, to innovative induction programmes emphasising the development of core study skills, and developing effective procedures to train pupils to cooperate rather than confront each other during lessons. Chapters cover: - Making a Good Start to Secondary Education. - Creating a Cooperative Classroom Climate - Improving Communication between Pupils and Teachers - Why are some classrooms more successful? - How can school structures influence positive relationships? The book is a much-needed resource for all secondary teachers, and is particularly useful for year and subject heads.
