Bullock, Hadow, and Coppola have set the standard for homeland security textbooks, and they follow up best-selling third edition with this substantially improved version. As with its predecessor, the book clearly delineates the bedrock principles of preparing for, mitigating, managing, and recovering from emergencies and disasters. However, this new edition emphasizes their value with improved clarity and focus. What's more, it has been thoroughly revised to include changes that are based on transformations relevant to the political, budgetary, and legal aspects of homeland security that have changed since the 2008 Presidential election (and subsequent change in the administration). These include: new chapters on intelligence and counterterrorism, border security, transportation security, and cybersecurity; an expansion of material on the organization of the Department of Homeland Security; strategic and philosophical changes that are recommended and/or that have occurred as a result of the Quadrennial Homeland Security Review completed in 2010; updated budgetary information on both homeland security programs, and on the homeland security grants that have supported safety and security actions at the state and local levels, as well as in the private sector; and changes in the way the public perceives and receives information about security risk, including the possible elimination of the Homeland Security Advisory System. * New chapter that focuses specifically on the border and transportation security missions * An increased focus on cyber security and infrastructure security, both of which are rapidly growing in importance in the homeland security field among officials at all levels * A companion website that includes a full online Instructor's Guide and PowerPoint Lecture Slides.

Warning: This erotica contains scenes and elements that may be disturbing to some readers. Please review the full content warning below. Jessica Martin is not a nice girl. As Prom Queen and Captain of the cheer squad, she'd ruled her school mercilessly, looking down her nose at everyone she deemed unworthy. The most unworthy of them all? The "freak," Manson Reed: her favorite victim. But a lot changes after high school. A freak like him never should have ended up at the same Halloween party as her. He never should have been able to beat her at a game of Drink or Dare. He never should have been able to humiliate her in front of everyone. Losing the game means taking the dare: a dare to serve Manson for the entire night as his slave. It's a dare that Jessica's pride - and curiosity - won't allow her to refuse. What ensues is a dark game of pleasure and pain, fear and desire. Is it only a game? Only revenge? Only a dare? Or is it something more? This book contains intense fantasy scenes of hard kinks/edgeplay, graphic sex, and harsh language. It is intended only for an adult audience. Beware: this is a dark, weird, kinky read. The activities depicted therein are dangerous and are not meant to be an example of realistic BDSM. Reader discretion is advised. Kinks/Fetishes within: erotic humiliation, fearplay, painplay, knifeplay, consensual non-consent (CNC), orgasm denial, boot worship, spanking, crying, blowjobs, clowns, group sexual activities, spit, bondage, public play, bloodplay.

PhysioEx 7.0 for A&P Benjamin Cummings

Chronic kidney disease is one of the world's major public health problems, and the prevalence of kidney failure is rising steadily. Among the risk factors for a faster progression of renal disease are hypertension and proteinuria, many studies clearly demonstrating that hypertension is both a cause and consequence of chronic kidney disease. Namely, renal blood pressure regulation seems to be involved in five major pathophysiological mechanisms (all closely related to the renin-angiotensin system): Pressure-natriuresis, renal sympathetic nervous system, renal blood flow, intraglomerular pressure and tubuloglomerular feedback. This book reviews experimental data which form the basis of our current understanding of the association between hypertension and kidney diseases: The pathogenesis of increased blood pressure, the mechanisms by which systemic hypertension promotes progressive kidney failure, and the impact of antihypertensive agents on experimental renal mechanisms involved in hypertension. Furthermore, the role of angiotensin II receptor blockers in both the control of systemic blood pressure and the reduction of proteinuria is examined in an attempt to define optimal therapeutic strategies to prevent the otherwise inexorable deterioration of renal function in patients with chronic kidney disease.

Using cases from the authors' files or from case files of other working clinicians, CASEBOOK IN ABNORMAL PSYCHOLOGY, International Edition portrays the rich and arresting nature of disorders manifested in real people. Cases illustrate every major DSM-IV category, followed by a therapy outcome section that tells the "rest of the story" of what happened to these clients. Using an integrative approach, the authors emphasize the multiple causes of disorders and incorporate developmental and cultural issues in each case. Complex cases are presented without a diagnosis, so students can come up with a diagnosis on their own. This Fourth Edition includes a new case on body dysmorphic disorder as well as two new cases without a diagnosis.
