Energy Audit of Building Systems: An Engineering Approach ...

An energy audit is an inspection survey and an analysis of energy flows for energy conservation in a building. It may include a process or system to reduce the amount of energy input into the system without negatively affecting the output. In commercial and industrial real estate, an energy audit is the first step in identifying opportunities to reduce energy expense and carbon footprint.

ENERGY AUDIT FOR BUILDINGS 1. INTRODUCTION The energy audit in a building is a feasibility study. For it not only serves to identify energy use among the various services and to identify opportunities for energy conservation [1], but it is also a crucial first step in establishing an energy management programme. The audit will produce the data
