## **3408 & 3408B INDUSTRIAL AND MARINE ENGINES Caterpillar**

In fact, we actually ran a contest in the early 1980s called the “Cat Economy Challenge” to promote the fuel efficiency of our 3406 and 3408 engines — giving away \$13,000 in prize money to the nation’s most fuel-efficient truckers. At the time, these Cat engines were hitting 7 mpg when most others were struggling to reach 5 mpg.

3408 Marine Engines | Cat®  
Parts Store

The Cat 3408 is a diesel internal combustion engine. A report on the Georgia State University website notes that, unlike an Otto cycle engine, which uses a spark plug to ignite gasoline fuel, a diesel engine uses compression to generate intense heat that causes the combustion of diesel fuel.

G3408 engines meet the most  
demanding continuous duty  
gas compression applications

with virtually no unscheduled  
downtime. Ideal applications  
for G3408 engines include gas  
lift, gas gathering, and  
wellhead gas compression.  
Cat G3408 gas engine.

The 3408 is a V8 variant of  
the popular 3406 engine. It  
was first introduced in the  
1970s and discontinued  
around 1985. Although  
considered pricey at the time  
(and a bit on the heavy side) it  
soon gained popularity,  
especially as a marine engine.
