Blackstone was a farm
implement maker. In
1896 they built lamp

start oil engines. By 1912 they had developed a new diesel engine that ran on vaporized oil and was fired by a spark. It did not need a hot bulb like most engines of the time.

Blackstone Labs analyzes the contents of used motor oil to check how well engines wear over time. Earlier this month, the lab used its vast database of used oil analyses to study whether certain...
