The Automotive Chassis Routledge

This textbook draws on the authors' experience gained by teaching courses for engineering students on e.g. vehicle mechanics, vehicle system design, and chassis design; and on their practical experience as engineering designers for vehicle and chassis components at a major automotive company. The book is primarily intended for students of automotive engineering, but also for all technicians and designers working in this field. Other enthusiastic engineers will also find it to be a useful technical guide. The present volume (The Automotive Chassis – Volume 1: Component Design) focuses on automotive chassis components, such as:• the structure, which is usually a ladder framework and supports all the remaining components of the vehicle;• the suspension for the mechanical linkage of the wheels;• the wheels and tires;• the steering system;• the brake system; and• the transmission system, used to apply engine torque to the driving wheels. This thoroughly revised and updated second edition presents recent developments, particularly in brake, steering, suspension and transmission subsystems. Special emphasis is given to modern control systems and control strategies.

Popular Science

Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends. Hardly. The short, unhappy life of the car, the men who built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got The Yugo: The Rise and Fall of the Worst Car in History. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist government. Zastava Automobiles, which overhauls its factory to produce an American-ready Yugo in six months. And a hole left by Detroit in the cheap subcompact market that creates a race to the bottom that leaves the Yugo . . . at the bottom.

In this new view of the Citroen story, automotive/aviation writer and design specialist Lance Cole investigates not just the details of the cars of Citroen, but the aeronautical and cultural origins that lay behind Citroen's form and function. The book digs deep into the ethos of Automobiles Citroen to create a narrative on one of the greatest car manufacturers in history. Using interviews, translations, archive documents and specially-commissioned photographs, the Citroen journey is cast in a fresh perspective. It explains in detail the influences upon Citroen design: Voisin, Lefebvre, Bertoni, Boulanger, Mages, Opron and recent Citroen designers such as Coco, Blakeslee and Soubirou. As well as all the men of the great period of 1920s-1970s expansion, it also cites less well-known names of Citroen's French engineering, design, and influence such as Cayla, Gerin, Giret, Harmand, Dargent and others, to give a full picture of Citroen heritage. The book provides in-depth analysis of all major Citroen models with an engineering and design focus and profiles key individuals and cars up to the present day and Citroen's 'DS'-branded resurgence. It features many newly commissioned photographs, rare archive drawings and interviews with Citroen owners. Researched amongst leading Citroen experts and restorers, Lance Cole provides a fresh perspective on the Citroen car manufacturer, its design language and the legacy of its extraordinary engineering which will be of great interest to all Citroen and motoring enthusiasts. Superbly illustrated with 329 colour photographs, many newly commissioned along with rare archive drawings.
