Expert practical advice from an experienced race engine builder on how to build an ignition system that delivers maximum power reliably. A lot is talked about ignition systems and there is a bewildering choice of expensive aftermarket parts, which all claim to deliver more power. Des Hammill cuts through the myth and hyperbole and tells readers what really works, so that they can build an excellent system without wasting money on parts and systems that simply don't deliver. Ignition timing and advance curves for modified engines is another minefield for the inexperienced, but Des uses his expert knowledge to tell readers

how to optimize the ignition timing of any high-performance engine.

There has been nothing published outside of Russia concerning the activities of its motor industry, by 1937 the Soviets had become the largest producers of motor vehicles in Europe, albeit with the help of Henry Ford The author decided to concentrate on the work of the pioneers in Czarist Russia, for their efforts were more diverse than those of their counterparts in the Soviet era. However, one Soviet motor car which was an indigenous product has been included to illustrate how the industry might have evolved if Henry Ford had not been approached. This is a comprehensive overview of all facets of vehicle production from the early days to the final demise of the Soviet Union. All the manufacturers of motor vehicles, certain accessories, military machines, and even aero engines are recorded

in this unique book.

This book is a trip down memory lane, recalling the days when Formula 5000 cars roared around the race tracks in Britain and Europe, creating a lot of noise and, occasionally, dust. The wail of a 5-litre engine was often more spine-tingling than ANY other racing car! Nowadays, many of the same cars show modern day spectators just what Formula 5000 was, back in the day. Few, if any, of the drivers are prima-donnas and many want to know what their car did before it came into their possession. This book answers those questions and many more.
