Lean Thinking was launched in the fall of 1996, just in time for the recession of 1997. It told the story of how American, European, and Japanese firms applied a simple set of principles called 'lean thinking' to survive the recession of 1991 and grow steadily in sales and profits through 1996. Even though the recession of 1997 never happened, companies were starving for information on how to make themselves leaner and more efficient. Now we are dealing with the recession of 2001 and the financial

meltdown of 2002. So what happened to the exemplar firms profiled in *Lean Thinking*? In the new fully revised edition of this bestselling book those pioneering lean thinkers are brought up to date. Authors James Womack and Daniel Jones offer new guidelines for lean thinking firms and bring their groundbreaking practices to a brand new generation of companies that are looking to stay one step ahead of the competition.

Most startups fail. But many of those failures are preventable. The Lean Startup is a new approach being adopted across the globe, changing the way companies are built and new products are launched. Eric Ries defines a startup as an organization dedicated to creating something new under conditions of extreme uncertainty. This is just as true for one person in a garage or a group of seasoned professionals in a Fortune 500 boardroom. What they have in common is a mission to penetrate that fog of uncertainty to discover a successful path to a sustainable business. The Lean Startup approach fosters companies that are both more capital efficient and that leverage human creativity more effectively. Inspired by lessons from lean manufacturing, it relies on “ validated learning, ” rapid scientific experimentation, as well as a number of counter-intuitive practices that shorten product development cycles, measure actual

progress without resorting to vanity metrics, and learn what customers really want. It enables a company to shift directions with agility, altering plans inch by inch, minute by minute. Rather than wasting time creating elaborate business plans, The Lean Startup offers entrepreneurs—in companies of all sizes—a way to test their vision continuously, to adapt and adjust before it ’ s too late. Ries provides a scientific approach to creating and managing successful startups in a age when companies need to innovate more than ever.

What can we tell about the future of automobiles and the industries that make them by examining their past? Wormald and Rennick trace the history of powered land transport, the rise and fall of the railways, the spectacular rise of the automobile, and what might come next. Delving into the mighty and complex automotive industry, following the growth of the markets and production, this book illustrates the globalization of vehicle manufacturers and component suppliers, giving form to the development of the industry's business model. A key factor in an auto-industry's successes and failures is the often-difficult relationship it has with government, which varies in nature from country to country. As an illustrative case, Wormald and Rennick present and analyse the entire lifecycle of Australia's automotive history - including its birth, growth, functioning and death - and its shifting relationship with the government that supported it.

THIS IS THE OLD 2nd EDITION. YOU SHOULD INSTEAD ORDER THE NEW EDITION. Services represent the largest portion of economic activity in developed nations, and are likely an important part of your business. Unfortunately, services traditionally have lacked the rigorous design tools we see used in designing physical products. This book describes a simple yet powerful service design tool known as PCN Analysis. The PCN tool will allow you to document and analyze the provider-customer interactions that take place in your business, showing where increased value can be realized by strategic repositioning of process elements. This book shows how firms can optimally design service operations to achieve value objectives. Firms that use this tool will be able to deliver exceptional service at lower costs than competing firms.
