The concept of 'harmonization' has become very

popular in China, with the Chinese government

increasingly applying the term 'harmonious

society' to internal affairs and the term

'harmonious world' to international relationships.

Harmonization as both an end and a means of

China's development is deeply rooted in China's

cultural tradition, which emphasizes moderation,

balance and harmony between human beings and

nature, between different social groups, and between

the Chinese and other nationalities. This book

examines the experience of enacting the concept of

harmonization in China in recent years. It explores

this in terms of developments within Chinese society,

economic developments and changes in business

practices, environmental challenges and coping

strategies, and changing patterns of international

relations. Throughout, it discusses the gaps between

rhetoric and reality, policy and practice.

The automobile industry is evolving rapidly on a

worldwide basis. Manufacturers are merging,

component design and manufacture are now

frequently outsourced instead of being created in-

house, brands are changing and the giant auto

makers are expanding deeper into providing financial

services to car buyers. The skyrocketing price of gas

spurs developments in hybrid technology and clean

diesel, as manufacturers look for ways to improve fuel

efficiency. Meanwhile, all of the biggest, most

successful firms have become totally global in nature.

Plunkett's Automobile Industry Almanac will be your

complete guide to this immense, fascinating industry.

On the car dealership side, giant, nationwide holding

companies have acquired the best dealers in major

markets. Even the used car business is being taken

over by national chains. E-commerce is having

profound effects on the car industry. Consumers use

the Internet to become better informed before

making a purchase. Online sites like Autobytel steer

millions of car buyers toward specific dealers while

the same sites deliver competing bids for cars,

insurance and financing in a manner that lowers costs

and improves satisfaction among consumers.

Meanwhile, auto makers are using the latest in e-

commerce methods to manage their supply chains

and replenish their inventories. This exciting new

book (which includes a database on CD-ROM) is a

complete reference tool for everything you need to

know about the car, truck and specialty vehicles

business, including: Automotive industry trends and

market research; Mergers, acquisitions, globalization;

Automobile manufacturers; Truck makers; Makers of

specialty vehicles such as RVs; Automobile loans,

insurance and other financial services; Dealerships;

Components manufacturers; Retail auto parts stores;

E-commerce; and much, much more. You'll find a

Innovation and Technology - Strategies and Policies contains a selection of outstanding contributions by world experts on how a culture of innovation is able to produce a response to fast global changes affecting society. The book describes major evolutionary directions and foreseen trends in: environment versus industry; technology breakthroughs; energy planning; education and research; intangible investment requirements; new health technologies; and economics and management of innovative actions at strategic, organisational and technological levels. The actual percolation of the innovative process throughout the multiple

facets of society is presented in relation to the main challenges facing us in the 21st Century. The book is addressed to all those concerned with innovation in dynamic terms as a creative response to the ongoing changes in society integrating sciences, technologies, humanities, life-long education and training, and other disciplines.

Auto manufacturing holds the promise of employing many young Indians in relatively well-paid, high-skill employment, but this promise is threatened by the industry's role as a site of immense conflict in recent years. This book asks: how do we explain this conflict? What are the implications of conflict for the ambitious economic development agendas of Indian governments? Based upon extensive field research in India's National Capital Region, this book is the first to focus on labour relations in the Indian auto industry. It proposes the theory that conflict in the auto industry has been driven by twin forces: first, the intersection of global networks of auto manufacturing with regional social structures which have always relied on informal and precariously-employed workers; and, second, the systematic displacement of securely-employed 'regular workers' by waves of precariously-employed 'de facto informal workers'.

The unprecedented globalization of the production process, dividing up the value chain, has brought the integration of trade and the disintegration of production, with deep implications for the international division of labor. Have Central European economies been able to readjust their production structures to international markets? Three of them: Estonia, Hungary,

and Slovakia have done especially well.
