Engine Firing Order

Why is there no 1-4-2-3 Firing order? Firing order for an engine is picked in the most efficient way to reduce vibrations and improve the engine balance. Most straight 4 cylinder engines use the 1-3-4-2 configuration. So why, according to...

350 Engine Firing Order Diagram | Automotive Parts Diagram ...

FIRING ORDER: · Internal combustion engine the firing order is the sequence of the ignition for the cylinders. In a spark ignition engine the firing order correspond to the order in which the spark plug produce the spark. In diesel engine the firing order for correspond to the order in which fuel is injected into the engine cylinder.

Firing Order Swaps: What's Best For Your Engine?

The typical firing order of Inline four cylinder engine is 1-3-4-2. Firing order in a multi-cylinder engine is arranged so that the torsional moment is even and the load is uniformly distributed on longitudinal direction of the crankshaft. An even firing order will increase the balance of engine.

Most 4-cylinder engines have a firing order of 1-3-4-2 although other firing orders such as 1-3-2-4, 1-4-3-2, 1-2-4-3 are possible. Consider the inline 4 engine in Figure 1. The

cylinders are usually numbered 1234
from the front of the engine where the
accessory drives (pulleys) are installed.
