It 's fairly obvious that one can 't be a ' perfect ' environmentalist. But that 's okay. Perfection isn 't the goal. A good life is. And a good life has as much to do with your intent as with the end result. " —from the Introduction The Newman 's Own Organics Guide to a Good Life is the essential book for those of us who can 't live in an organic hemp tepee but do care about our quality of life, global warming, clean water, and disappearing resources. Nell Newman shows you how to do what is within easy reach. Along with realistic, practical advice, she shows how and why living a more environmentally conscious life benefits you and your immediate surroundings. In addition to recycling and reusing, the book covers consumer-related steps such as • how buying and eating organic food supports small farms (and tastes better, too) • how you can buy clean power through your regular power company • which long-distance telephone companies offer competitive pricing and service while returning a portion of their profits to environmental and educational organizations • where to buy everything—from pots and pans to pet food—so that you can " vote with your dollar " and feel good about your purchases Packed with profiles of fascinating—and sometimes zany—people and a heavy dose of sanity, this book is organized according to the way you really live, making it easy to identify what areas of change are viable for you. A resource directory of publications, retailers, groups, and associations is included in the back of the book.

Titans of the legal profession clash as Rev. Thomas Jeremiah Luther brings a lawsuit about abortion to attempt to gain control of the country's political right wing. Religion, medicine and science explode in courtroom drama over when life begins. Texas trial lawyer Larry D. Thompson has crafted a courtroom drama that is in a class with such notables as *Inherit the Wind*, *The Verdict* and *The Rainmaker*, a novel critics predict will become a modern day classic. T. J. Luther, a Southern evangelist has been in a coma for twelve years, kept alive by only a tube in his abdomen. On Christmas Eve, twelve years after he was stabbed and nearly died, he awakens. Some called it a miracle. Some called it the will of God. As he regains his strength, he forces his replacement from the pulpit and re-takes his lucrative, international ministry. Learning that Lucy Baines Brady, the young niece of one of his Board Members nearly died from an abortion, he seizes her cause as a way to wrest control of the evangelical right from other Christian conservatives. Raising two million dollars from other pro-life organizations, he hires J. Robert Tisdale, the best plaintiff lawyer in the country, to sue Dr. Zeke Moyo and the national abortion clinic for \$100,000,000. If he can put abortion clinics out of business, he will have a legitimate claim to lead the political right wing. When he begins to accuse the clinic and Dr. Moyo of murder, he fails to recognize the courtroom savvy of Tod Duncan, Dr. Moyo's lawyer. Duncan sues the pro-life forces for slander and turns a trial that began as one about medical malpractice into a trial about human life itself and when it begins.

The new Dodge Charger, Challenger, and other LX-platform cars bring modern V-8 performance to unparalleled heights, and the new Challenger and Charger Hellcats are the most powerful American production cars today. The outrageous performance and audacious styling has earned a large and dedicated following. However, you can tune and modify the Chrysler 300, Dodge Magnum, Charger, and Challenger for more performance, and for many owners, fast is not fast enough. In the pursuit of a higher-performing LX-platform car, former Mopar Muscle editor Randy Bolig has created this book to show you how to extract ultimate performance from these cars. Chrysler has built more than one million Chargers, Challengers, and other full-size-platform cars starting with the Dodge Magnum and Chrysler 300. These cars offer competent handling, braking, and suspension performance, but they can be made much better through a set of targeted upgrades using better aftermarket equipment. Bolig gives you a comprehensive guide to the cars and engines. He details the features, benefits, and drawbacks of each package or set of upgrades, so you select the best modification for your car, application, and budget. He also covers basic to extreme modifications for the R/T and SRT8 models with the 5.7-, 6.1-, and 6.4-liter Hemi engines. Guidance for installing heads, rotating assemblies, ignition upgrades, higher-performance injectors, and many other parts are provided. But, this book doesn't just discuss performance; it shows you how to do it with comprehensive, step-by-step product installs for a cat-back exhaust system, hand-held ignition tuner, cold-air intake, and supercharger. If you have been searching for the best performance package to make your Charger, Challenger, or full-size Chrysler car stand out from the crowd, you need this book. It has the latest information, so you can learn how to install all the products and get your car back out on the road.

Ten years ago, the United States contracted with a private American and European research institute to develop a biochemical artificial intelligence system for use in a very unique computer. That research was subcontracted to a firm in China. This year the early prototype was completed and released by that institute to the United States, while the Chinese firm covertly shared the information with their political and business allies, thus starting a new era. The President of the United States stalls while governments from all over the world join GATE in an effort to help their people. The United States is pressured to join other world governments or lose all trade rights in the global market, thereby destroying the U.S. economy. Across the nation a dramatically rapid increase in crime and a fear of economic disaster has led to massive demonstrations in support of GATE. As demonstrations increase they have turned violent with rioting in the streets and all of this has led to talk in Congress of impeaching the President. In Europe, elite U.S. military forces use a Top Secret aircraft to learn more about GATE, and are hunted by those who were allies. The Shepherds race against time . . . DAVID K. BAKER has served as an Anglican priest in Indiana, California and Arizona, and is presently serving as the Rector of Grace Anglican Church in Idaho. He has taught undergraduate criminal investigation courses in Germany, taught first and second grades in a private academy in California, and served over twenty years in the U.S. Army, eighteen of which were with the CID. He presently lives in Idaho with his wife Jeanmarie.
