A landmark new history from design journalist Nick Hull, Land Rover Design – 70 years of Success offers a detailed insight to the company's design story, from the early days of Land Rover in Solihull to the latest generation of the Range Rover Velar in 2018. The Land Rover was born from a desperate need by the Rover Company to develop a stop-gap model to provide cashflow in the post-war years. The original aim of a simple 4x4 agricultural tool soon developed into a multi-purpose vehicle that became the mainstay of the British Army and produced

numerous offshoots for the emergency services, police, forestry and aid agencies worldwide. This book details the personalities involved in the various projects since the late 1940s up to today: the designers, modellers and studio engineers. It charts the development of Land Rover and Range Rover projects in the UK, particularly those designed in the Gaydon studio that opened in 1996, and is still a key part of JLR ' s design resource. From the early days of chalk drawings and wooden models to today ' s digital renderings and milled clays for the latest Range Rover Evoque, Land Rover ' s designers and technicians have never been short of creativity. This book tells their story, in their own words, and is a fitting tribute to the spirit and ethos of Land Rover design and engineering.

Housam 'Sam' Najjair was born in Dublin to an Irish mother and a Libyan father. In June 2011, as his father's home country was being torn apart by civil war, he left Ireland on a one-way ticket to Tunisia, crossing into war-torn Libya, to join the uprising against the dictator Gaddafi. Soldier for a Summer charts his journey - from his arrival into Libya to training in the Western Mountains for twelve weeks before advancing on Tripoli. On 20 August 2011, Sam and the now famous Tripoli Brigade - a unit of the National Liberation Army of Libya - were the first revolutionaries to enter the city, and subsequently secure it and Martyrs' Square. From meeting representatives of NATO to covert operatives, arms deals, the death of his close friend and colleague, safe-houses and a captured girl sniper, this is the astounding story of how a young Irish-Libyan revolutionary became a battlefield commander of a unit of the National Liberation Army of Libya - an unforgettable account of a single season that liberated a country and transformed a young man.

The Sultanate of Oman occupies the southeastern part of the Arab Peninsula. The country is beautiful and is full of unspoiled nature. The sun shines almost every day. The temperatures are pleasant during winter, but it is often unbearably hot during summer. The country is as large as Italy but sparsely populated. It has oil, gas, and a variety of minerals. The rapid development of Oman takes place with respect for its cultural heritage. His Majesty Sultan Qaboos and the people of Oman are admired for having transformed Oman from a backwards, non-unified country into a modern, homogenous state with a high standard of living dominated by tolerance and growing democracy. It is blessed with a ruler, His Majesty Sultan Qaboos bin Said, who has what may be called absolute power, which he uses with great care and wisdom. He is a true servant of his people.
