Hydro ' s current maintenance philosophy  
is to complete an engine overhaul on all  
diesel engines every 20,000 hrs. This  
philosophy was established as a result of  
a review of the maintenance tactics and  
failure history in 2003. Performing

overhauls too frequently results in  
additional expenditure for negligible  
improvement in reliability.

Most engine overhaulers are very reluctant to perform partial overhauls. In almost no case will they give any kind of warranty unless every aspect of the engine is gone through and all necessary parts and components replaced. Because of that, most reputable overhaulers do not like to make partial overhauls.
