WALNECK'S CLASSIC CYCLE TRADER, JULY 1995 Causey Enterprises, LLC Since 1991, the popular and highly modifiable Ford 4.6-liter has become a modern-day V-8 phenomenon, powering everything from Ford Mustangs to hand-built hot rods and the 5.4-liter has powered trucks, SUVs, the Shelby GT500, and more. The wildly popular 4.6-liter has created an industry unto itself with a huge supply of aftermarket high-performance

parts, machine services, and accessories. Its design delivers exceptional potential, flexibility, and reliability. The 4.6-liter can be built to produce 300 hp up to 2,000 hp, and in turn, it has become a favorite among rebuilders, racers, and high-performance enthusiasts. 4.6-/5.4-Liter Ford Engines: How to Rebuild expertly guides you through each step of rebuilding a 4.6-liter as well as a 5.4-liter engine, providing essential information and insightful detail. This volume delivers the complete nuts-and-bolts rebuild story, so the enthusiast can professionally rebuild an engine at home and achieve the desired performance goals. In addition, it contains a retrospective of the engine family, essential identification information, and component differences between engines made at Romeo and Windsor factories for identifying your engine and selecting the right parts. It also covers how to properly plan a 4.6-/5.4-liter build-up and choose the best equipment for your engine's particular application. As with all Workbench Series books, this book is packed with detailed photos and comprehensive captions, where you are guided step by step through the disassembly, machine work, assembly, start-up, break-in, and tuning procedures for all iterations of the 4.6-/5.4-liter engines, including 2-valve and 3-valve SOHC and the 4-valve DOHC versions. It also includes an easy-to-reference spec chart and suppliers guide so you find the right equipment for your particular build up.

Strategic Planning A Practical Guide  
Peter Rea, Ph.D., Harold Kerzner,  
Ph.D. In today's business world,  
now more than ever, the only  
constant is change. With technology  
producing a steady stream of  
innovations, consumer preferences  
shifting rapidly, and world-wide free  
trade increasing, successful  
managers face a growing challenge  
to remain a step ahead of the  
future. From business students to  
corporate managers, anyone  
interested in this discipline will find  
no resource more insightful and  
engaging than Strategic Planning: A  
Practical Guide. From their  
extensive experience consulting  
with Fortune 500 companies, Rea  
and Kerzner have succeeded in  
crafting the definitive introduction  
to strategic planning and  
management policy and  
strategy--from the grass-  
roots principles to the practical  
applications utilized by  
organizations today. Examining the  
integral roles of finance, marketing,  
learning curves, research and

development, inventory control,  
and manufacturing techniques,  
Strategic Planning presents  
a comprehensive overview of the  
development and implementation  
of contemporary strategic planning  
models applicable to both small  
and large businesses. Rather than  
teaching complex, integrated  
theory, the authors offer a straight-  
forward approach to  
demonstrate strategic planning and  
management policy techniques.  
With step-by-step methods on how  
to apply relevant material, along  
with discussion questions, and  
problems designed to highlight  
the practical application of particular  
issues, companies can successfully  
formulate and implement strategic  
initiatives to:

- \* Establish a clear direction for the future
- \* Make decisions across levels and functions
- \* Improve organizational performance
- \* Build teamwork and expertise
- \* Aid executives in thinking and behaving strategically

\* And more!

After the IPS2 conferences in Cranfield and Linköping in 2009 and 2010 the 3rd CIRP International Conference on Industrial Product Service Systems (IPS2) 2011 takes place in Braunschweig, Germany. IPS2 itself is defined as “ an integrated industrial product and service offering that delivers value in use ” . The customers expect comprehensive solutions, which are adapted to their individual needs. IPS2 offers the possibility to stand out from competition and for long-term customer loyalty. Particularly in times of economic crisis it becomes apparent which producing companies understand to satisfy the needs and requirements of their customers. Especially in this relatively new domain IPS2 it will be important to keep track of the whole context and to seek cooperation with other research fields and disciplines. The 3rd CIRP International Conference on Industrial Product Service Systems (IPS2) 2011 serves as a platform for such collaborations and the discussion of new scientific ideas.
