It will not waste your time. resign yourself to me, the e-book will definitely atmosphere you other matter to read. Just invest tiny period to contact this on-line publication **Engine Sputters At Idle** as with ease as review them wherever you are now.

Top 10 Causes of a Rough Idle

When a car sputters as it idles, this means the car is either not getting enough power or fuel. To test the problem, the driver presses down on the gas peddle. If doing so makes the car stop sputtering, there is a problem with fuel delivery. If this does not help, there is a problem with the power supply. sputter, idle, hesitation, SOLVED!!!!!! - Maintenance and ...

A sputtering car engine may be caused by one or more faulty components. The problem could stem from the ignition secondary system, which includes such parts as spark plugs, spark plug wires, distributor cap and rotor.

19hp Briggs sputters at high idle

If your outboard engine is sputtering at any speed, idle or full throttle, it could be the result of several common malfunctions. You may need to make a few timing adjustments or replace a spark plug, or you may need serious mechanical inquiry.

Engine misfiring or stumbling is a sign that your car is not getting enough power from the engine during acceleration. A car sputters when accelerating due to the fact air and fuel is not being properly mixed, therefore, forcing the car to run on unburned fuel.

[2011 Chevrolet Cruze sputters at idle except when AC is on ...](#)

Well, I have been having the same problems that many of us on here are having with an iradic idle, hesitation under load, and sputtering up to like 3000 rpm. My idle was so bad it started dieing on its own. I took my car to the shop, and this is what was done. 1. Changed both o2 sensors (I had a check engine light) 2. replaced fuel pump

[How to Fix a Sputtering Car Engine | It Still Runs](#)

Erratic engine idle can be caused by various factors, but

the most common and likely cause is a dirty or malfunctioning Mass Air Flow (MAF) sensor. The MAF sensor is located in the intake manifold, close to the throttle valve. What can cause a car to idle high?

Why Car Sputters When Accelerating? - Paul's Gigantic Garage

Engine sputters, idles rough, then dies. Just did it twice in a row while sitting in the driveway after about a 15-20 min. trip home. I had shut of the AC and it was idling fine while in park, got out opened up the garage door and got back in put it in drive and it immediately started idling rough then sputtered out and died.

2005 Chevrolet Cobalt Sputters At Idle: 5 Complaints
hey guys have a 2001 f150 with 5.4 today my engine starting sputtering at idle but only when in drive or reverse. when in park its fine. when i get to a light the rpm go back and forth between 600 and 700. i just had a tune up done and throttle body cleaned. its very cold out here and the car does have a knn cold air intake. starting to think this could be the problem? any advice? there is no ...

Engine Sputters At Idle

The electronic throttle body is what controls the engine idle speed under all conditions. So for example, when you come to a stop, the computer commands the electronic throttle body to open to a certain position for the idle condition. If the throttle body is dirty, it can cause the engine to idle rough.

Why Does My Outboard Sputter at Full Throttle? | It Still Runs

The IAC valve controls the engine ' s idle speed under

all conditions. For example, when you come to a stop with the AC on, the compressor puts a load on the engine. This load can cause the engine to idle rough. The job of the IAC valve is to slightly bump the idle speed up so the engine idles smoothly.

Engine Sputters At Idle

What Does It Mean When a Car Sputters As It Idles ...

Sputters At Idle. 2005 Chevrolet Cobalt ... When the engine is at idle, it will frequently "shudder" and the RPM will dip down to a low level, approximately ~500. This causes the engine to nearly ...

Service Engine Light On, Sputtering on Idle, Squealing ...

Why is my car shaking and sputtering while idle? So yesterday after I got off the highway I noticed a pretty harsh shaking and sputtering noise when I came to a light off the highway. The car runs fine when I'm accelerating, but when I come to a stop it shakes and feels as if it's going to stall out, the temperature gauge also usually...

What causes a car to sputter and idle rough? |

AnswersDrive

It sputters intermittently at high idle but fine at low idle. Any ideas what it could be. Drained and put fresh gas in, changed fuel filter, and took bottom of carb/ float off and cleaned them.

engine sputtering - Ford F150 Forum

When it fails a vacuum leak results and is generally described as a whistle sound occurring at idle only, a check engine light and rough idle result in conjunction. If you are sure of yourself, remove the cover that says 'Ecotec'.....this pops off pulling straight up.

Why is my car shaking and sputtering while idle? |

Yahoo ...

When an engine is running at idle speed, it generates enough power to operate systems such as the water pump, alternator, and power steering — but not enough power to move the vehicle itself. A passenger car will usually idle between 600-1000 RPMs. A properly functioning idle should feel smooth — no bumps or skips. So what causes a rough idle?
