Remove the cap and check the gas tank for evidence of water (if you see the liquid separating or looking like two different colors). If there is water in your tank, siphon or drain it, then add new gas. After old gas in the line works its way through the mower's engine it should stop

and run like new again.  
*Car Starts but Engine Sputters While Starting / Cartech Home*  
When the engine idles, the carb butterflies are closed. The idle air is provided through the holes in the butterflies.  
Special dedicated idle passages cast in the upper carb body provide fuel through them—they are very small. Over years of time, they

can reduce in size due to dried fuel.  
**Engine Sputters At Idle**  
When the car is idling in neutral or with clutch fully engaged the engine sputters, kind of revs and then drops. It doesn't die, and when the accelerator is engaged even a little, or I have the car in any gear, there are no issues. Also having the
