If the engine also sputters when the engine is idling but not while driving, in other words, it stops sputtering when you start driving or rev up the engine, then the problem is a bad valve. As indicated that the car sputters both when starting and at idle. But, when you start driving, the sputtering goes away, it smoothes out.
Engine Sputters At Idle - remaxvn.com
If your outboard engine is sputtering at any speed, idle or full throttle, it could be the result of several common malfunctions. You may need to make a few timing adjustments or replace a spark miss/sputter/hesitation at idle but runs fine at higher ...
Another possible culprit is a faulty component affecting the air-fuel mixture like a bad oxygen sensor, throttle position sensor or engine temperature sensor. The steps suggested below will help you solve the most common cases of a sputtering car engine. Step 1 Inspect the components on the secondary ignition system.

How to fix sputtering in your engine's idle - YouTube
When you start the car from a cold start it'll idle in the low 800-900 rpms, rev up a few times into 1100-1200 then idle fine at 1000rpms. or just die out. After that it runs perfectly fine. If you start it up and drive, it chugs, sputters, backfires, you can push the gas pedal to the floor and it does no good.

Car Starts but Engine Sputters While Starting | Cartech Home

Prior to that, unburned fuel that never made it into the engine was simply drained into the water. Very bad for the environment, and bound to make you unpopular at the launch ramp, as your engine leaves rainbows of fuel/oil in the water as you idle away from the dock!

Engine sputters when idle, does not hesitate or sputter w...

When the car is idling in neutral or with clutch fully engaged the engine sputters, kind of revs and then drops. It doesn't die, and when the accelerator is engaged even a little, or I have the car in any gear, there are no issues. Also having the A/C on makes it sputter significantly less, sometimes not at all.

The fuel injectors are vital for supplying fuel to the combustion chambers. You can check whether they... Vacuum hoses. Vacuum hoses have ...

Engine Sputter Sound Effects ~ Engine Sputter Sounds | Pond5

Remove the cap and check the gas tank for evidence of water (if you see the liquid separating or looking like two different colors). If there is water in your tank, siphon or drain it, then add new gas. After old gas in the line works its way through the mower ' s engine it should stop sputtering and run like new again.

What Causes a Car to Sputter and Idle Rough | Cartech Home

When the engine idles, the carb butterflys are closed. The idle air is provided through the holes in the butterflys. Special dedicated idle passages cast in the upper carb body provide fuel through them-they are very small. Over years of time, they can reduce in size due to dried fuel.
