Standard Motor Products MCTS1 Engine Temperature Sensor

Should the engine go into high temp mode, when the RPMs reach 1200 the WBO2 sensor will make sure the fuel mixture is a richer fuel mixture to prevent stumbling. LC1 WBO2 Test Results Summary Here are the summary graphs for an OEM engine during a 16 minute idle test.

2008 Harley Sportster Overheating (Troubleshooting)

well since I can't get an answer anywhere I'm gonna post this here. has anyone found another suitable engine temperature sensor that could be used for the xb's I have an 04 xb12r and my sensor wire is toast so I need a new one and the dealers don't have any or the one dealer that seems to have 2 won't respond to me

so any help is appreciated.

Sensors | Harley Davidson Motorcycle Parts

What should the oil temperature be on a Harley Davidson v-twin. I have a 2007 Road Glide and just got one of those cool digital oil temperature thermometers for father's day. When it is around 90 degrees outside, my oil temperature is around 255 degrees. Is that right, or is that too hot. Since I never had a thermometer before, I have no idea what the engine or oil temperature normally is.

Actual engine temp with the bike running measured in the heads (Where the new temp sensor is located on the Sportster which gives a higher reading than on big twins because of this location) usually gives a running temp in the range of

290-320. Keep in mind that the temp reading on the metric bike comparison was not engine temp but coolant temp.
