Of the legendary names in the history of the Ford Mustang, one stands apart: Boss. Originally created to homologate the new Boss 302 engine for SCCA Trans-Am racing, the Boss 302 Mustang was built in limited numbers for the street. Designed by legend Larry Shinoda, the Boss cars were easily distinguished from their less potent stable mates by their unique front and rear spoilers, rear window slats, and the omission of the standard Mustang's (fake) rear fender brake ducts. Also standard was a shaker hood scoop and bold graphics. Though Mustang performance faded to all-time lows as the 1970s rolled on, there was good news on the way. The pairing of the venerable 302 Windsor engine with the new Fox-body platform for the 1979 Mustang might not have seemed significant at the time, but it was the first edition of what would become a performance institution in the late 20th century: the 5-liter Mustang was an overwhelming force on the streets and tracks through the end of its production in 1995. With no small amount of fanfare, Ford is paying homage to its performance past with the re-introduction of the 5.0 liter powerplant in the Mustang GT for 2011.

The story of Kar-Kraft began, as did many others in the

automotive industry, with an axe to grind. In 1963, Ford was seriously interested in purchasing Ferrari. Ferrari was a legendary brand with considerable success in racing, and Ford saw the acquisition as a great way to be instantly successful in the racing arena. When Enzo Ferrari realized that Ford would not give him complete control of the racing program, he backed out of the deal late in the process. Ford had spent millions in vetting and audits, which then set in motion a vengeful response against Ferrari. The result was the unthinkable: Ford beat Ferrari at Le Mans. Ford wanted to become competitive quickly, but it did not have the race history or resources in house. To remedy the situation, Ford searched the U.K. for an independent company to help accelerate its race car development. It first settled on Lola Cars and set up Ford Advanced Vehicles. Later, Ford brought its LeMans effort to the U.S. and the Kar-Kraft relationship was established. Although Kar-Kraft was technically an independent company, it really only had one customer: Ford Special Vehicles. Kar-Kraft's story doesn't begin and end with the GT 40 that took the win away from Ferrari at Le Mans. Ford expanded upon the program and organized an all-out assault on racing in general. Cars were prepared for Trans-Am, NASCAR, NHRA, and Can-Am competition. Street versions of the Boss 429 were assembled under its roof. And fabled prototypes including the LID Mustang, Boss 302 Maverick, and Mach 2C were all assembled in Ford's contracted race shop. And then, out of the blue, its doors closed for good on a cold day in 1970. History tells us that Ford won Le Mans, the Daytona 500, and the Trans-Am championship. But it doesn't tell us how this was accomplished. Author Charlie Henry (a former Kar-Kraft employee) has enlisted the help of many of his former co-workers to bring you the very first book ever published on Ford's all-encompassing special projects facility, Kar-Kraft. p.pl {margin: 0.0px 0.0px 0.0px 0.0px; font: 12.0px Arial}

When Ford wanted to add some spice to its new Mustang pony car in the mid-1960s, it turned to the talented, colorful, and opinionated Texan Carroll Shelby, who was then building the high-performance, Fordpowered Cobra racing sports car. The result: the Shelby Mustang GT350, perhaps the definitive performance Mustang of the muscle car era. Ford released its newest Mustang in 2005, the first truly all-new Mustang since 1979, returning the model to the spotlight. Shelby himself was directly involved in defining what is the most powerful factory-produced Mustang ever. This up-to-the-minute history from award winning authors Randy Leffingwell and David Newhardt traces the Shelby Mustang story from the early Shelby American cars built in a converted airplane hangar in Southern California to the 2010 version of the new Shelby Mustang.

The Ford Boss Mustang is the most iconic pony car ever created, and this book covers it more extensively than any other. Boss Mustang: 50 Years—a fully expanded version of Mustang Boss 302—includes the complete history of its creation; racing and street histories of both the 302 and 429 models; and photos and interviews with Boss Mustang designers, engineers, racers, and more. Of all the legendary names in the history of the Ford Mustang, one stands apart: Boss. Originally created to homologate the new Boss 302 engine and option package for SCCA Trans-Am racing, the Mustang Boss 302 debuted for the 1969 model year and was built in limited numbers for the street through 1970. This book features never-before-seen production and racing photography, interviews with designers and engineers, and keen insight from author Donald Farr, a renowned Ford historian and Ford hall-of-fame inductee. Designed by the legendary Larry Shinoda, the Boss cars were easily distinguished from their less potent stablemates by their race-bred powerplant, standard front spoiler, and bold graphics. In 2012, Ford at long last revived this most revered of all Mustang models. With a new racing counterpart and a modern street version that delivers more than 440 horsepower, the Boss was truly back! In 2013, Ford rolled out the Boss one more time. In Boss Mustang: 50 Years, Mustang historian Donald Farr offers a complete history of the car—from its late 1960s origins in Ford's boardrooms through its Trans-Am successes and untimely demise in 1970, up to the conception and development of the spectacular, limited-edition 2012 and 2013 Boss Mustangs. Packed with brilliant photography and firsthand accounts from the people who created the original Boss, as well as the team that resurrected Ford's most iconic Mustang for the 21st century, this is the story every Mustang enthusiast has been waiting to read.

Author Steve Magnante is well known for his encyclopedia-like knowledge of automotive facts. The details he regularly shares, both in the pages of national magazines and as a contributing host and tech expert at the popular Barrett-Jackson Auctions on television, are the kinds of details that car fanatics love to hear. Many feel that these facts are among the highlights of television auction coverage, much more interesting than the final hammer price. Steve turns his attention to the most popular car in history, the Ford Mustang. In more than 50 years, the Mustang has taken many turns, from the original pony car, to variants that are best described as pure muscle cars, to the misunderstood Mustang II, to the Fox-Body platform that revived the brand, all the way to the modern Coyote- and Voodoo-powered supercars. Magnante covers them all here, generation by generation, so that Mustang fans of any generation are sure to love this collection. Whether you're an avid fan of all Mustangs, a trivia buff who wants to stump your friends, or have a particular affinity for a particular era of Mustangs, this book is an informative and entertaining collection of facts from one of the industry's most beloved and respected sources. The 2005 Mustang, to be released by Ford forty years after the original Mustang, will be both a departure and a return to tradition, as Ford steps away from the aging Fox chassis for its flagship car, yet brings back styling cues from the most popular Mustangs of the past. Ford found inspiration for the new Mustang from its 1967 Fastback model. The 2005 retro-look pony car will include a 4.6-liter, V-8 engine with 300 horsepower — the highest horsepower of any previously built Mustang. This book traces the new Mustang's evolution from the drawing board to the production line to the street. A photographic celebration of the new car, this book delivers the inside story behind the rejuvenation of one of the most storied cars in automotive history.

The automotive industry underwent great change in the 1960s and the early 1970s. The continuing trend toward market consolidation, the proliferation of sizes and nameplates, and the “need for speed” characterized this period, loosely labeled as the muscle car era. This is an exhaustive reference work to American made cars of model years 1960–1972. Organized by year (and summarizing the market annually), it provides a yearly update on each make’s status and production figures, then details all models offered for that year. Model listings include available body styles, base prices, engine and transmission choices, power ratings, standard equipment, major options and their prices, curb weight and dimensions (interior and exterior), paint color choices, changes from the previous year’s model, and sales figures. Also given are assembly plant locations and historical overviews of each model nameplate. The book is profusely illustrated with 1,018 photographs.

In 1970, the American muscle car was as fast and outrageous as it would ever get. But the end was nigh, and 1970 Maximum Muscle dives head-first into the storm before the calm. Wherever you mark the beginning of the muscle car era—Oldsmobile’s 1949 Rocket 88, Chrysler’s 1951 FirePower engines, the 1964 Pontiac GTO—one thing is certain: in 1970, the era that had witnessed a parade of gloriously powerful, stylish, and brawny cars apt to make the hearts of even the most dispassionate squares go pitter-patter was sucking fumes. Gasoline shortages, skyrocketing fuel prices, insurance-industry bean counters, rising ecological concerns, and new, more fuel-efficient imports all conspired to consign the American muscle car to an ugly and unseemly denouement. Yet 1970 saw the actual zenith of the cars themselves, the year manufacturers pulled out all the stops and produced the most powerful and stunning machines the automotive world had ever seen. 1970 Maximum Muscle not only explores the factors that led to the decline of the most exciting era in the American automotive industry, it details some of the new models and model options that arguably made 1970 the climax of the muscle car era from engineering, styling, and cultural standpoints. As the war among GM, Ford, Chrysler, and AMC played out at dealerships, dragstrips, and drive-ins, ready-and-willing gearheads drove off dealer lots in potent behemoths like the Buick GSX, Oldsmobile 4-4-2, and Ford Torino Cobra. Muscle car stalwarts like the SS Chevelle, Pontiac GTO, and Plymouth ‘Cuda became available with optional LS-6, Stage 1, and Hemi engines, respectively. Manufacturers ratcheted up the advertising hyperbole at the same time, offering performance packages with names like “Six-Pack,” “Ram Air,” and “Cobra Jet,” while spoilers, scoops, hood tachometers, and decal packages were de rigueur. Meanwhile, on the popular SCCA Trans Am circuit, top drivers campaigned more nimble muscle off-the-rack cars like the Camaro Z/28 and Boss 302 Mustang. 1970 Maximum Muscle is an entertaining and rollicking look at the muscle car's peak year!

A narrative like no other: a cultural history that explores how cars have both propelled and reflected the American experience— from the Model T to the Prius. From the assembly lines of Henry Ford to the open roads of Route 66, from the lore of Jack Kerouac to the sex appeal of the Hot Rod, America’s history is a vehicular history—an idea brought brilliantly to life in this major work by Pulitzer Prize–winning journalist Paul Ingrassia. Ingrassia offers a wondrous epic in fifteen automobiles, including the Corvette, the Beetle, and the Chevy Corvair, as well as the personalities and tales behind them: Robert McNamara’s unlikely role in Lee Iacocca’s Mustang, John Z. DeLorean’s Pontiac GTO , Henry Ford’s Model T, as well as Honda’s Accord, the BMW 3 Series, and the Jeep, among others. Through these cars and these characters, Ingrassia shows how the car

has expressed the particularly American tension between the lure of freedom and the obligations of utility. He also takes us through the rise of American manufacturing, the suburbanization of the country, the birth of the hippie and the yuppie, the emancipation of women, and many more fateful episodes and eras, including the car’s unintended consequences: trial lawyers, energy crises, and urban sprawl. Narrative history of the highest caliber, Engines of Change is an entirely edifying new way to look at the American story.

Shelby Mustang Mustang Boss 302

Come along on Mustang's wild ride to automotive success. In the early 1960s, Lee Iacocca - then director of the Ford division at Ford Motor Company - convinced Henry Ford II to produce a sporty four-seat car aimed at the emerging youth market. That car, essentially a reconfigured and re-skinned Falcon economy car, became the Ford Mustang, and it changed the automotive world like no other car before or since. In Ford Mustang: America's Original Pony Car, acclaimed Mustang writer Donald Farr celebrates this unbroken lineage of muscle. He chronicles the car's phenomenal first-year sales, the new pony car category it pioneered, and subsequent models that include the Mustang GT, Shelby GT350, Shelby GT500, Super Cobra Jet, Boss 302, and Boss 429 - all part of a line of American performance cars that continues to this day. Created in cooperation with Ford Motor Company and featuring some 400 photos from its historic and media archives, Ford Mustang is a must on the bookshelf of any muscle car or Ford aficionado.
