In China, John Leighton
Stuart (1876-1962) is a
controversial figure occupying
an important position in the
history of modern China and
Sino-U.S. relations. As a
scholar and educator, Stuart
loved Chinese culture and
contributed much to the
development of Chinese
education. While as a
missionary, he was inherently
prejudiced against Marxism.
As the U.S. ambassador to
China, Stuart executed U.S.
government's policy, and was
finally stereotyped as a symbol
of "American imperialism".
This book gives a detailed
account of Stuart's
complicated and deep political
involvement in modern China.
Stuart had close relationships
with Chiang Kai-shek and
other high-ranking officials of
Kuomintang (KMT), while
he was also an honored guest
of Mao Tse-tung and Chinese

Communist Party (CCP). During his tenure as the U.S. Ambassador to China, Stuart did implement U.S. government's policy of supporting KMT. But when the CCP's gaining power became inevitable, he took a pragmatic attitude and urged the U.S. government to normalize its diplomatic relations with the Communist Government. These seemingly contradictory behaviors reveal Stuart's complex features and the changeable era. By collecting substantial relevant materials both at home and abroad, both published and unpublished, this book reveals Stuart's multidimensional characters, getting rid of the stereotype. Academic and general readers interested in Stuart, modern Chinese history and Sino-U.S. relations will be attracted by this book.

"We cannot change the cards we are dealt, just how we play the hand."---Randy Pausch
A lot of professors give talks titled "The Last Lecture." Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently

been diagnosed with terminal cancer. But the lecture he gave--"Really Achieving Your Childhood Dreams"--wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because "time is all you have...and you may find one day that you have less than you think"). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given

it an indelible form. It is a book that will be shared for generations to come.

The protagonist Suhaas is attending his own college farewell party. He meets a stranger, a girl who he has never seen before. She asks him to entertain her. He tells that he got a low AIEEE ranking and his engineering college which is

in Gurgaon is just fine. It is not interesting or exciting as any top notch college. Still, to humour her he agrees to tell his own story. He tells his story in first person from the first to the seventh chapter. Suhaas tells the fate of all his friends and himself. The girl reveals her purpose, which is a surprise. Read it to believe it! A must-read for all college students, housewives, young readers and executives. Proceedings and Debates of the ... Congress University of Michigan Press ELT

When Siddhartha Guatama, a Hindu prince, renounced the world in search of the meaning of life, he became known as the Buddha, or "the enlightened one." Through penance, asceticism, and meditation he created the Four Noble Truths and the Noble Eightfold Path, the basic tenets of Buddhism. Collected here, taken from the sacred books of Buddhism, are the essential spiritual truths he taught.

By any measure, Hans Mark was a warrior of the Cold War. Born in Mannheim, Germany, in 1929, he spent his early childhood in Vienna before escaping the Nazi Anschluss in 1938 and eventually emigrating to the United States, settling in New York. He graduated from high school in 1947, went west to attend the University of California, Berkeley, and later earned a PhD in physics from MIT. His work in nuclear engineering soon set him on a path that would be shaped by aeronautics, space exploration, and national defense. It was through advanced technology that Mark believed the United

States could win the Cold War. In *An Anxious Peace*, Mark recounts in detail his life as a twentieth-century “rocket man.” Here is the inside story of one who—in a career spanning more than six decades—was on the technological front line, from long-range bombers to the space shuttle. Along the way, Mark reveals many never-before-told stories from life at NASA and more. Readers will revel in learning the background behind the decision to place a plaque on Pioneer 10, a space probe that the NASA Ames Research Center designed to fly past the asteroid belt, Jupiter, and Saturn to collect data and images. Mark tells how he, Carl Sagan, and NASA insider John Naugle kept secret the addition of the now iconic 6x9-inch aluminum “message from humanity”

until the probe had been launched. To this day Mark is pushing for a manned mission to Mars. One thing is sure: Hans Mark has left a major impact on academic and scientific communities that will be felt for decades to come.

Giving Academic Presentations provides guidance on academic-style presentations for advanced students. A goal of the text is to make presenters aware that giving an effective academic presentation requires mastery of a broad range of skills. Among the topics covered in the book are: analyses of speeches, examination of different major speech types, tips for improving non-verbal behaviour, suggestions for speaker-listener interaction; discussion of the importance of using evidence in academic speaking; definitions and discussion of fillers; advice

on preparing PPT slides; practical advice on preparing and practicing speeches; and pronunciation work on pausing, stress, and intonation.

With James Callaghan in No. 10

Citadel Press

The first volume of Bernard

Donoughue's *Downing Street*

Diary was described by Charles

Moore in the *Daily Telegraph*

as 'the best account of Harold

Wilson's last days'; 'the sheer

scale and detail are fascinating'

wrote Peter Riddell in the *Times*

Literary Supplement. This

second volume covers the three

years, 1976-79, when

Donoughue was Senior Policy

Advisor to James Callaghan. At

first Callaghan quickly

established dominance over his

cabinet and restored calm after

the plots and scandals of the

later Wilson years. His incomes

policy reduced inflation and, in

the teeth of opposition from the

left wing, he negotiated the

notorious IMF loan at the

expense of eliminating some of Labour's most cherished dreams. By 1978, Callaghan, a politician of great patriotism and decency, seemed to have succeeded in steering Britain into calmer waters. But then the storm broke. Trade union militants brushed aside their mediocre leaders and launched a ferocious attack on Callaghan's pay policy, driving up inflation and demonstrating the government's impotence. In the diaries we see the prime minister and the government paralysed as the 'Winter of Discontent' began to bite and politics took to the streets. As Labour drifted to inevitable defeat in the 1979 election we see Callaghan fighting honourably. From the smoke of battle there emerges a striking new leader: Margaret Thatcher. The diaries describe vividly both the decline and final collapse of 'old' Labour and how Mrs Thatcher took the opportunity to launch her crusade to

dismantle trade union power and much of the British public sector. Besides James Callaghan the chief figures in this volume of Lord Donoughue's diaries are Roy Jenkins, Denis Healey, Tony Crosland, Michael Foot, Shirley Williams, David Owen and Tony Benn.
