Conquering the dating market—from an economist's point of view After more than twenty years, economist Paul Oyer found himself back on the dating scene—but what a difference a few years made. Dating was now dominated by sites like Match.com, eHarmony, and OkCupid. But Oyer had a secret weapon: economics. It turns out that dating sites are no different than the markets Oyer had spent a lifetime studying. Monster.com, eBay, and other sites where

individuals come together to find a match gave Oyer startling insight into the modern dating scene. The arcane language of economics—search, signaling, adverse selection, cheap talk, statistical discrimination, thick markets, and network externalities—provides a useful guide to finding a mate. Using the ideas that are central to how markets and economics and dating work, Oyer shows how you can apply these ideas to take advantage of the economics in everyday life, all around you, all the time. For all online daters—and for anyone else swimming in the vast sea of the information economy—this book uses Oyer's own experiences, and those of millions of others, to help you navigate the key economic concepts that drive the modern age.

Would you like to meditate while dancing Tango? Yes, Buddha can teach you to dance Tango through Zen. You might ask, "How does Tango have anything to do with Zen?" TangoZen is an innovative yet natural way of meditating while dancing Tango. Referring to striking similarities between the two, this book will introduce methods through which Tango dancers and non-dancers can practice TangoZen to experience and enjoy the wonderful benefits, which both Tango and Zen have to offer. Everybody knows meditation is a good thing. For example, Zen meditation, if practiced properly, can create balance, calmness, groundedness, centering, and harmony in mind and body. However, it is difficult to meditate for many reasons. Meditation is mainly practiced while sitting with legs crossed to support and ground one's body. Unfortunately this sitting posture can create uncomfortable feelings and even pains before you benefit from the meditation practice. In addition, despite the importance of practicing meditation regularly, it can be difficult to stick to it with regularity due to the hectic life style we live every day. Can one meditate while moving around instead of sitting down? Although it appears to be sedate and passive, Zen meditation can also be practiced in more active ways than the sitting posture. For example, walking meditation has been practiced among Buddhists since the Buddha himself practiced it. Other forms of Zen meditation in motion can also be found in sports and performing arts.
