engineering economics is that  
money generates money. You  
cannot compare \$10.00 today  
to \$10.00 a year from now  
without adjusting for the  
investment potential. A simple  
example would be to take the  
\$10.00 and put it in a savings  
account at 2% interests. After  
a year you have \$10.20  
instead of \$10.00.

Engineering economics, previously known as engineering economy, is a subset of economics concerned with the use and "...application of economic principles" in the analysis of engineering decisions. As a discipline, it is focused on the branch of economics known as microeconomics in that it studies the behavior of individuals and firms in making decisions regarding the allocation of limited resources. Thus, it focuses on the decision making process, its context and environment.
