Engineering Economics 4-1 - Valparaiso University  
 engineering economics is that money generates money. You cannot compare \$10.00 today to \$10.00 a year from now without adjusting for the

---

investment potential. A simple example would be to take the \$10.00 and put it in a savings account at 2% interests. After a year you have \$10.20 instead of \$10.00.

*Engineering Economics Tarach -*

*embraceafricagroup.co.za*

Engineering economics, previously known as engineering economy, is a subset of economics concerned with the use and "...application of economic principles" in the analysis of engineering decisions. As a discipline, it is focused on the branch of economics known as microeconomics in that it studies the behavior of individuals and firms in making decisions regarding the allocation of limited resources. Thus, it focuses on the decision making process, its context and environment. It is pragmatic by
