This book by Ponce is a classic. I'm  
using it to study for the Hydrology  
portion of the PE exam and it's straight  
to the point. I really liked how he  
demystifies some of the concepts for  
the civil engineers who didn't specialize  
in Hydrology/Water Resources. Glad to  
have the book in my Engineering  
library.

In the time elapsed since its original  
development, the NRCS runoff curve  
number method has become a de facto  
standard in hydrologic engineering practice,  
with numerous applications in the U.S. and  
other countries (Ponce and Hawkins,  
1996). Its popularity is based on its  
simplicity, although reasonable care is  
necessary in order to use the method  
correctly.
