"Introduction to Engineering Mathematics" series is compiled specifically for the faculty and students at all engineering colleges of Dr A.P.J. Abdul Kalam Technical University (AKTU), Lucknow, UP along with other engineering institutes which might follow the same course pattern. With a completely new syllabus, the subject is fully covered in a single textbook. Therefore for "Integral Transform and Discrete Maths" students and faculties need not refer to multiple texts anymore. Replete with well-placed examples to complement the theory, the book enables students to

learn effortlessly of so-called difficult topics as well.

We are delighted to introduce "Paramount 1111," a comprehensive guide tailored specifically for Civil Engineering aspirants. This book is designed to meet the growing demand for accurate, concise, and conceptually robust solutions to all questions. "Paramount 1111" serves as an excellent supplement for GATE 2025-2026 (EE) preparation, offering: Step-by-step solutions to all questions, ensuring clarity and ease of understanding. A thorough analysis of questions, categorized by concept, to facilitate a deeper comprehension of the subject matter. Solutions presented in simple, accessible language, making complex concepts more manageable. We are confident that this title will distinguish itself from similar publications, thanks to the dedication and expertise of the GATE ACADEMY team. Their hard work and consistency have been instrumental in crafting a script that is both informative and engaging. function, and Bessel's function. It explains how to solve Cauchy equations, differential equation with variable coefficients and Frobenius of solving differential equation at a regular singular point. Besides, the text also explains the notions of limit, continuity and differentiability by giving a thorough grounding on analytic functions and their relations with harmonic functions. In addition, the book introduces the exponential function of a complex variable, and with the help of this function, defines trigonometric and hyperbolic functions and explains their properties. While discussing different mathematical concepts, the book discusses a number of theorems such as Cauchy's integral theorem for the integration of a complex variable, Taylor's theorem for the analysis of complex power series, the residue theorem for evaluation of residues, the argument principle and Rouché's theorem for the determination of the number of zeroes of complex polynomials. Finally, the book gives a thorough exposition of conformal mappings and develops the theory of bilinear transformation.
