For researchers in business, government and academe, the ""Dictionary"" decodes abbreviations and acronyms for approximately 720,000 associations, banks, government authorities, military intelligence agencies, universities and other teaching and research establishments.

The Quarterly Journal of Engineering Geology

Technical and vocational education and training at technical schools are major contributing factors in combating poverty, unemployment, and inequality. The primary purpose of technical and vocational education and training is to prepare students and learners for the world of work and for a smooth transition from education institutions into the workplace.

As the Fourth Industrial Revolution continues to create more radical changes in the labor market, experts are calling for a reform of education, including vocational education and training and adult and professional education. New Models for Technical and Vocational Education and Training is an essential scholarly research book that examines TVET and CET

colleges and programs that provide intermediate skills to enhance students' chances of employability and entrepreneurship in Industry 4.0. The book explores knowledge in respect to workforce preparation, digital skills development, teaching and learning of TVET, flexibility and articulation of TVET to respond to work-integrated learning, and reskilling and upskilling to avoid skill mismatches. It is ideal for TVET schools, academicians, curriculum designers, managers, training officers, administrators, vocational professionals, researchers, and students.
