I was 21 when I finished my University degree in Computer Visualization and Games. I was a freshman with no work experience in this field. I was looking for jobs in computer field, mainly games development, web design or 3d animation. It was hard to get 1 interview; I remember those days when I use to apply for dozens of jobs every day. I have been to countless online job recruiters (Reed, Monster, Indeed, etc.) Also, in many Job Center Plus and career advisors such as: Seetec, YMCA and many others. Been in many libraries not for reading books but to apply and to get advice in how to get in

to the job market. It was taught but eventually I landed in my desired field. Every time I visited the above places my CV was rewritten countless times, until I found how to write a perfect CV from employers' point of view. This took a lot of patients and hard work but eventually I started to get dozens of interviews. I found the secret of writing an interview winning CV. Every time I used to apply for just a few jobs and would get 1 to 3 interviews a week. And this is what I want you to archive. I want you to get job interviews, I want you to learn how to write an interview winning CV. A CV that is written from employers' point of view. In this book titled "CV Resume Writing Techniques Get Hired Immediately" you will learn all the CV writing techniques that will guarantee you an interview. Plus, many interview winning techniques that you should know such as: how to prepare for an interview, how to do research before an interview, most common questions at an interview and how to answer them. After reading this book you will be able to write you own CV from employers' point of view that will give you multiple job interviews a week. Results may vary; however, this book is based on my experience in how I got multiple interviews by learning how to write a perfect CV. I also share with you on this book several ways in how to apply for jobs. Not only online but also by writing a cover letter and sending speculative letters.

Communications skills are essential to all professional practices, but often it is a skill for which most engineers are least prepared. The authors provide a hands-on approach on communicating more effectively in the workplace. This comprehensive guidebook tailors instructions to the special needs of engineers, as real world examples illustrate a variety of communication

situations. Topics include: procrastination, technical writing style, communicating technical data and statistics, ethical considerations, technical reports, oral communication, graphics and visual aids, business correspondence, resumes, job interviews, and nonverbal communication. Undergraduate and graduate students, as well as professionals just entering the work force, will find this book an easy-to-read and concise handbook for mastering the fundamentals of professional and technical communication.

The lessons from Engineering Jobology 101 may be the difference between getting a "good enough" job and landing your dream job! "Eric coached me through my job search as I graduated from college. Because of the principles taught in Engineering Jobology 101 I landed multiple job offers and used them as leverage to raise my starting salary by several thousand dollars! That was money that I could have easily left on the table without his help. I highly recommend that every engineering student read and apply the teachings in this book. It will pay off big time." -K. H., Aeronautical Engineer at Lockheed Martin "There has been a severe lack of resources to help engineers land

their dream jobs. Engineering Jobology 101 finally fills that need. Eric speaks in the language of engineering to provide all the steps, equations, and algorithms necessary for an engineer to launch a successful career." -M.W., HR at Honeywell Public Speaking and Technical Writing Skills for Engineering Students Hispanic Engineer & Information Technology is a publication devoted to science and technology and to promoting opportunities in those fields for Hispanic Americans. Resumes for Engineering Careers Peterson's For more than 15 years, The Academic Job Search Handbook has assisted job seekers in all academic disciplines in their search for faculty positions. The guide includes information on aspects of the search that are common to all levels, with invaluable tips for those seeking their first or second faculty position. This new edition provides updated advice and addresses hot topics in the competitive job market of today, including the challenges faced by dual-career couples, job search issues for pregnant candidates, and advice on how to deal with gaps in a CV. The chapter on alternatives to academic jobs has been

expanded, and sample resumes from individuals seeking nonfaculty positions are included. The book begins with an overview of the hiring process and a timetable for applying for academic positions. It then gives detailed information on application materials, interviewing, negotiating job offers, and starting the new job. Guidance throughout is aimed at all candidates, with frequent reference to the specifics of job searches in scientific and technical fields as well as those in the humanities and social sciences. Advice on seeking postdoctoral opportunities is also included. Perhaps the most significant contribution is the inclusion of sample vitas. The Academic Job Search Handbook describes the organization and content of the vita and includes samples from a variety of fields. In addition to CVs and research statements, new in this edition are a sample interview itinerary, a teaching portfolio, and a sample offer letter. The job search correspondence section has also been updated, and there is current information on Internet search methods and useful websites.
